1919 Seed Catalogue

**GARDEN and
FARM GUIDE**

**Darrow Bros. Seed & Supply
Company**

Twin Falls, Idaho

INTRODUCTION

The growth of our business called for a larger and better catalog this year than we have ever issued before, but war conditions have interfered with our plans, paper, printing, postage and everything connected with a catalog is higher in price than ever known before, we concluded that this was no time to make radical changes, the expense would be too great.

However, we are in better position to serve the best interests of our customers the coming season than at any time in the past. Our stocks are in ample supply this season on most items, which has not been true during most of this war period.

Having been in the seed business here at Twin Falls since the country was first settled and growing up with the country, we feel ourselves to be an **Old Established Institution** in this section. Our business has grown with the development of the country, every year has brought a good increase in our trade, and there is a reason. If we were not supplying our people with **High Quality Seeds** we could not hold our trade from year to year, we are not only holding our trade but increasing it substantially every year.

We attribute our success mainly to the fact that our seeds and goods are giving satisfaction. If we were not supplying **High Quality Seeds** at right prices our old customers would not stand by us and new ones would not come.

Our Goods and Prices

It has always been our aim to offer nothing but the best in seeds, and to keep our prices as reasonable as possible consistent with **high quality**. There may be some seed houses offering some seeds at lower prices but we maintain that there are none offering our quality for less money than ours cost you. If you will show us your samples and prices from other houses and let us show you our goods, we think we can convince you.

Our Guarantee

The word Guarantee is one that is very much abused and very much misunderstood. All seedmen who have been in the business for any length of time realize the fact that, on account of the many peculiar conditions surrounding the growing, handling and planting of seeds, it is practically impossible to guarantee seeds absolutely in any way. Realizing this fact, practically all reliable seed houses have agreed on and use the same guarantee as we give you below.

All seeds, plants and bulbs are subject to climatic and other conditions over which we have no control, after once being placed in the ground. Therefore, Darrow Bros. Seed & Supply Co. give no warranty, expressed or implied, as to description, quality, productiveness, or any other matter of any seeds, plants or bulbs they send out, and they will be in no way responsible for the crop. Every order for articles named in this catalog will be executed on these conditions only. If purchaser does not accept goods on these terms they are at once to be returned.

While we exercise great care to have all seeds we put out pure and reliable, and we realize that the future of our business depends on our handling only reliable seeds, we sell on the above guarantee only.

General Suggestions to Customers

How to Order

Fill out the order sheet enclosed herewith, writing your name and address very plainly.
SEND CASH ALONG WITH ORDER.

Remittances may be made by postoffice or Express Money Order, Draft, Stamps or Currency. We prefer that you do not send stamps for amounts over 50c. Be sure to register your letters if they contain cash. Money orders are the safest, most economical and practical way of remitting.

BEFORE SENDING YOUR ORDER READ PARCEL POST INSTRUCTIONS, and NOTE WHETHER PRICES QUOTED INCLUDE POSTAGE, if not add postage as may be required.

Parcel Post Instructions

Parcel Post rates are fixed by zones. The greater the distance the higher the rate.

PLEASE NOTE THAT OUR PRICES ON ALL GARDEN SEEDS INCLUDE POSTAGE UNLESS SPECIFIED OTHERWISE. In the first and second zones we lay down all garden seeds, including BEANS, PEAS and SWEET CORN, on which other houses charge postage. The first and second zones include all territory within 150 miles in a straight line from Twin Falls. **Your zone is noted on inside cover of catalog.**

The above applies **ONLY** to GARDEN SEEDS and **NOT** TO FIELD SEEDS or SUPPLIES, UNLESS SO SPECIFIED IN CATALOG QUOTATIONS.

Outside the second zone our prices on all GARDEN SEEDS INCLUDE POSTAGE except on PEAS, BEANS and SWEET CORN.

If located outside the second zone and you wish your order to come by mail, add postage on Peas, Beans, Sweet Corn, Field Seeds and other goods as follows:

3RD ZONE (up to 300 miles from Twin Falls): 6c for the first pound, 1c for each additional pound.

4TH ZONE (up to 600 miles from Twin Falls): 7c for the first pound, 2c for each additional pound.

5TH ZONE (up to 1000 miles from Twin Falls): 8c for the first pound, 4c for each additional pound.

Up to 70 POUNDS can be mailed in the FIRST and SECOND and THIRD ZONES. Beyond the THIRD ZONE 50 pounds is the weight limit.

All prices quoted by freight or express are f. o. b. Twin Falls—You pay the freight or express.

Where Our Seeds Are Grown

The impression prevails with some people that certain seed houses grow all their own seeds. This is a mistaken idea, as it is manifestly impossible for any seed house to grow everything offered by them. Certain districts have peculiar advantages for producing certain seeds, while the same varieties will not do well in other districts. All seedsmen secure their seeds from the districts producing the various varieties to the best advantage. We do not claim to grow all our own seeds, but do grow all we can grow to advantage. Our seeds come from all parts of this country and many of them from foreign countries, but we favor northern localities in buying wherever possible, as the northern grown stock is generally earlier than that from southern sections.

Buy our bulk seeds and you will have the satisfaction of knowing that you are getting as good as you can find in the market.

FARM SEEDS

All Quotations on Grasses, Clovers, Grains subject to market changes

The subject of good farm seeds is becoming of greater importance to Idaho farmers from year to year. This is rapidly coming to be a great seed producing state and the quality of the seeds produced is of the utmost importance to the grower. It is becoming more difficult every year to dispose of inferior farm seeds, and rightly so. All over the country, state after state has passed seed laws restricting the sale of farm seeds containing noxious weeds, and in a very few years it will not be possible to dispose of such seeds at any price. When buying seeds or grain to sow on your farm do not let a slight difference in price blind you to the importance of having the best you can possibly obtain. Foul and impure seeds are dear at any price, and what do you profit if you save a few cents per acre on the sowing if you produce a crop that you can not sell, or must sell at a sacrifice? Use care in buying seeds and grain for sowing purposes and then keep your fields clean—it will pay you well to do it.

Our interest in keeping the seeds of this section free from noxious weeds is as great, or grater, than yours. We handle a great many car loads of seeds every year, ship them out and we cannot afford to take chances on impure stock. We want to make and keep this a clean seed district and always do our very best to furnish our customers with the best and cleanest stock possible.

Alfalfa

This is, and always will be, Idaho's greatest forage crop. It produces more feed per acre and better feed than any other crop known. Alfalfa needs no introduction to the Idaho farmer—he knows its value and how and when to sow. We aim always to have the very best and purest stock in the market. It is impossible to quote prices as the market changes from day to day. Write us your requirements and we will gladly quote prices and mail samples on request. We have a fine stock of first-class seed this season. However, the demand is very heavy and we look for advances in the market. See our Farm Seed price list for present prices.

Clover Seed

We take particular pride in the quality of clover seed that we offer. This is without doubt Idaho's most important seed crop. We are in the front rank in the production of high quality clover seed and must hold our position. The only way we can maintain our reputation is by producing the cleanest and best seed possible, and the only way this can be done is to sow clean seed and then keep your fields free from weeds. In buying clover seed for our trade we reject everything that shows noxious weeds. We have never knowingly sold a pound of seed containing noxious weeds since we have been in business. Much inferior seed is offered for sale and we want to warn our customers against it. When in need of clover seed write for quotations, stating quantity you require. We give you State test on each lot.

MEDIUM RED OR JUNE CLOVER

This is regarded as the most valuable of the clover family and is a dependable all around variety for farmers and stock men. In this section it is our most important clover crop and a sure money maker, both for hay and for seed. Sow either with grain or by itself, reasonably early in spring. Use 10 to 12 lbs. per acre. See Farm Seed price list for present prices.

ALSIKE OR SWEDISH CLOVER

This is one of the hardiest varieties known. It is perennial and does not winter kill. It will do better on moist land than any other variety of clover and is suitable for either hay or pasture. When sown with other grasses it forms a thick undergrowth and greatly increases the yield. Perhaps its greatest value to this section is as a seed producer. It never fails to seed here and produces a very high yield of fine quality seed. A hard clover to keep pure and free from weeds, hence it is very important that you sow clean seed. Our stock of alsike is particularly free from weeds and of high quality. Sow 6 to 8 lbs. per acre. Handle in same manner as red clover. Write us for samples and quotations on tested seed.

WHITE OR DUTCH CLOVER

A low, close growing clover, round, white heads, very fragrant. Very desirable for lawn mixtures. Farmers of this section have become very much interested in the growing of white clover for seed, and it is proving a profitable venture. It is more difficult to procure good pure seed stock in this than in any other variety of clover. In the past we have scoured the country for the best and purest stock to be obtained, and we now have home grown stock from this seed to offer. You can not find better, purer stock than we have to offer you. Write us for samples and quotations. Sow 7 to 8 lbs. per acre for seed growing. Sow white clover straight; do not sow with a grain crop.

SWEET CLOVER

All over the country the importance and value of SWEET CLOVER is being realized and it is coming to the front in popularity faster than any other plant we have known. It has proven itself one of our most valuable forage plants, does not take second place to any of them, not even excepting alfalfa. Sweet clover grows and flourishes under the most adverse conditions and never fails to improve the soil on which it grows. As a fertilizer it has no equal, it roots deep and fills the soil with nitrogen; when plowed down the roots decay quickly, leaving the soil in the finest possible condition for other crops. If cut young it makes fine hay, claimed

to be equal in feeding value to the best alfalfa hay, In this western country its greatest value is as a pasture plant, produces more feed than any other grass or forage plant with practically no danger of bloat. Sweet clover is particularly valuable as pasture for our stock men of this section and many of them are now sowing it extensively. It is the best clover to mix with tame pastures, we recommend it in all of our mixtures. Fine to sow on alkali soils, will grow on land so strong in alkali that few other plants will thrive and when started on such soils, it reduces the alkali, redeeming the land for other crops.

Sow at the rate of 10 to 12 lbs. per acre, as you would sow alfalfa or other clovers. On account of the hardness of the seeds, Sweet Clover is slow to germinate and often fails to make a good stand. SCARIFYING the seed overcomes the difficulty and practically insures a

good quick stand. We have the machinery for scarifying and offer our trade the finest of scarified seed. Price: 10 lbs. \$3.50, postage paid to third zone.

See FARM SEED price list herewith for present prices on larger quantities.

CRIMSON CLOVER

This is an annual clover, used extensively in some sections as a fertilizer of worn out soils. In this section should be sown in the spring of the year, as it is apt to winter kill if sown in the fall. Will make a hay or seed crop the first season. This would be a good variety for sowing in orchards as a cover crop. A crop of hay or seed could be cut the first season from sowing and it could then be turned under, leaving the ground in fine condition. Should be sown 10 to 15 lbs. per acre in same manner as you would handle red clover. Write for prices.

One of our Mixed Pastures near Twin Falls

Every Farm Should Have a Good Mixed Pasture

It is not our policy to advise our customers to grow any particular crops but we make an exception in the case of PASTURE GRASSES. EVERY FARM SHOULD HAVE A GOOD MIXED PASTURE AND EVERY FARMER SHOULD BE A LIVE STOCK FARMER TO A CERTAIN EXTENT. LIVE STOCK FARMING SHOULD BE THE FOUNDATION ON WHICH EVERY FARMER SHOULD BUILD. It is safe, it is sure, it is profitable. Unlike other crops, your live stock crop does not fail and it can always be turned into money on short notice. Your stock grows and increases in value and numbers night and day, year by year and your credit and bank account increase proportionately. A GOOD PASTURE WELL COVERED WITH GOOD LIVE STOCK WILL MAKE YOU MORE MONEY ON THE AVERAGE THAN ANY OTHER PIECE OF LAND OF EQUAL SIZE ON YOUR FARM. You can farm at a minimum expense and maximum profit with grass and live stock.

SOW GRASS NOW; DO NOT WAIT. GET READY FOR LIVE STOCK FARMING.

Pastures can be sown at almost any time of year, but winter and spring are best. Write us for information on how to sow and care for a pasture.

Pasture Grasses

We consider the subject of Pasture Grasses one of the most important that the Idaho farmer has to consider. It is a subject that has always deeply interested us and we have given it special study. There is no place on earth where grass grows more luxuriantly, no place where good pastures will carry more live stock per acre, and few places where stock can be run on pasture for a longer season. With advantages such as these there is money in grass and live stock. The raising and marketing of live stock is, without doubt, one of the most profitable branches of agriculture. Live stock is decreasing in numbers in all parts of the country, the population is increasing, the supply of meat and dairy products is not keeping pace with population. You can not overdo the production of meat and dairy products. Make GRASS and LIVE STOCK the foundation of your farming operations and you will not go

wrong. SOW A PASTURE. DO IT NOW and you will be taking the first step toward the keeping of live stock, a safe and profitable industry.

Good Clean Grass Seed

There is a greater variation in the quality and purity of grass seeds than of any other seeds handled by seedsmen. **QUALITY AND PURITY MEAN EVERYTHING** in grass seed. It is important that you get high quality; it means high germination and good stands. It is important that the seed be as pure as possible; you do not want noxious weeds on your land and you are more than likely to get them in low grade grass seed. We handle nothing but the **VERY HIGHEST GRADE and PUREST GRASS SEEDS THAT WE CAN BUY.** Let us send you samples and quotations and compare our quality with others offered.

Kentucky Blue Grass

KENTUCKY BLUE GRASS

This grass makes the best, sweetest and most nutritious pasture for all kinds of stock. Starts very early in the spring and in this section remains at its best through the whole season. Very hardy and will stand hard freezing weather and drouth without injury. The roots are so thick and stout that it forms a heavy sod and very thick undergrowth, which makes it particularly valuable as a pasture grass. Kentucky Blue requires about two seasons to get well started and at its best; when well set no grass will make more or better pasture for all kinds of stock. No pasture mixture is complete without Kentucky Blue Grass. A great deal of this seed is offered for sale that is of inferior quality, the bulk of the stock offered runs not more than 19 to 20 lbs. per bushel. Ours is cleaned down to 24 lbs. per bushel **PURE STOCK OF VERY HIGH QUALITY. YOU COULD NOT BUY BETTER.** We do not know of a house offering anything to equal it. Sow 20 to 24 lbs per acre without nurse crop.

See price list following.

ORCHARD GRASS

A valuable grass for pasture or hay, fine for mixing with alfalfa, making a high quality mixed hay. On account of its earliness is very valuable as permanent pasture. When closely cropped it grows up again very quickly. It withstands drouth very well and is very hardy. This is a particularly valuable grass for Idaho and we recommend it in every pasture mixture. Sow not less than 20 lbs. per acre.

See price list following.

MEADOW FESCUE OR ENGLISH BLUE GRASS

Especially adapted for permanent pastures, and fine for hay. Grows two to three feet tall but not in tufts like orchard grass. Stands drouth exceptionally well. This grass is a favorite in Southern Idaho; we recommend it in all pasture mixtures.

Some of our customers are talking of raising Meadow Fescue as a seed crop, and we are inclined to encourage them in this, as it appears like a profitable crop, looks best of all grasses as a seed proposition for this section. In buying our stock we use great care to have it pure and of high quality in order that any seed produced from it may be of the same quality. This grass would work well as a combined pasture and seed venture. If interested in growing seed write us for information, which we will gladly give you.

See price list following.

ENGLISH OR PERENNIAL RYE GRASS

The pasture grass of the British Isles; a very valuable pasture grass. Produces an abundance of fine, close growing foliage, which remains bright and green during the whole growing season. In habit of growth resembles Kentucky Blue Grass, but sets quicker and makes a fine growth the first season from sowing. Will stand close pasturing. We recommend this grass in all pasture mixtures.

See price list following.

English or Perennial			
Rye Grass	35c	1.60	3.00

See Farm and Grass Seed Price List herewith for prices in larger quantities.

Orchard Grass

ITALIAN RYE GRASS

This resembles the English Rye Grass. Makes a great growth the first season from sowing. Valuable for pasture and hay, grows very quickly and will stand close pasturing. A very fine grass.

See price list following.

TALL MEADOW OAT GRASS

A strong growing very vigorous grass of exceedingly fine quality either for pasture or hay. As a hay grass a better quality than Timothy; also a better yielder; a very rapid grower; will make a crop of hay quickly the first season from sowing. As a pasture grass it can not be beaten; grows very fast, comes early in spring and remains green in the fall later than any other grass we know of. A good grass for irrigated lands; also good where water is deficient, as it seems to stand drouth remarkably well.

RED TOP

A valuable grass for moist rich soils, where it thrives to best advantage. It should be fed close; if allowed to grow up to seed cattle dislike it. On good soils grows about two feet tall. A good grass to grow in connection with other grasses. If your land is low and moist try Red Top. Sow about 10 lbs. per acre of hulled seed. We strongly recommend a mixture of Red Top and Alsike Clover for waterlogged lands or low places.

See price list following.

BROMUS INERMIS—BROME GRASS

A very hardy drouth resisting grass. Yields heavy crops and makes abundant pasture. We particularly recommend brome grass to be sown on high dry lands. It will withstand drouth better than any other grass we know of. We do not recommend brome to be sown on irrigated lands. Sow 20 to 24 lbs. per acre broadcast. Can be sown any time of year, but perhaps the best time is early spring.

See price list following.

TIMOTHY

As a hay crop timothy is probably unsurpassed by any other grass. Especially good for horse feed. We do not recommend timothy for pastures as there are so many more valuable grasses for that purpose. Fine for mixing with red or alsike clover for hay. Sow 12 lbs. per acre when sown alone with grain.

See price list below.

Pasture Mixtures

We do not offer a prepared mixture for pastures, preferring to let our customers buy the grasses separately and do their own mixing. In this way the customer knows exactly what he is buying and sowing, which he does not know when sowing a prepared mixture.

We recommend the following as the mixture best adapted to our soil and weather conditions, and claim it will carry more stock per acre and produce better feed than any other mixture you could sow. Use not less than 20 lbs. per acre as follows:

- 5 lbs. Kentucky Blue Grass.
- 5 lbs. Meadow Fescue.
- 6 lbs. Orchard Grass.
- 4 lbs. Perennial Rye Grass.

In addition to above we recommend that you sow 2 to 5 lbs. of Sweet Clover (scarified seed); there is no better legume to use in a pasture mixture. It makes an abundance of fine feed with practically no danger from bloat and greatly fertilizes the soil, causing the grass to grow more vigorously.

If you do not use the Sweet Clover then you should use 2 lbs. either Red or Alsike Clover;

to get best results you must use a legume in grass pasture.

Some may object to putting clover in the mixture for fear of bloating stock, but it is absolutely necessary to have a legume in grass mixtures in this country in order to fertilize the grass and produce a good, strong, vigorous growth. It is only where the clover predominates in a mixture that there is danger from bloat. We have recommended and sold the above mixture for many years and find no complaint of bloat.

If you want a mixture without clover, we suggest that you increase the amount of Perennial Rye Grass to six pounds per acre and the Kentucky Blue Grass and Meadow Fescue to six pounds each. You will need more grass if you do not use the clover.

Grass should be sown by itself and never with grain. Sow either early in spring or in August. We recommend the spring sowing as best. Sow broadcast on well prepared ground and harrow lightly. Keep well watered and do not pasture the first season. If you will follow our instructions you will have a pasture that will carry the maximum number of stock the second season from sowing.

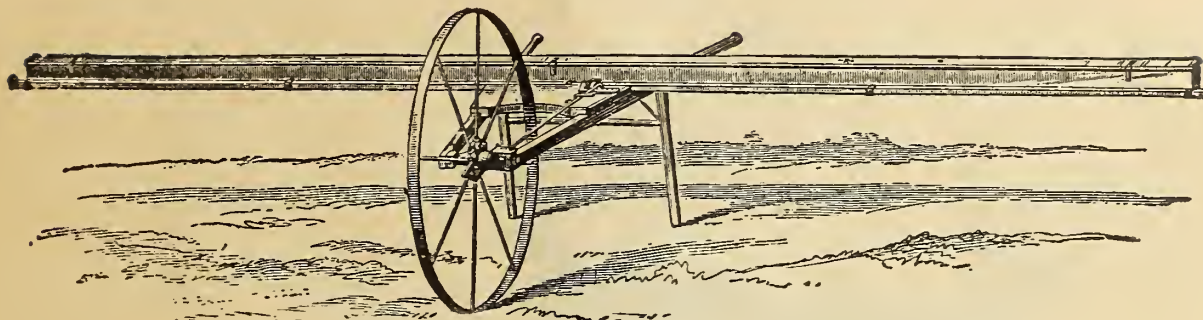

SOW DARROW BROS. GRASS SEEDS—THEY ARE THE BEST THAT MONEY WILL BUY.

Royal Wheelbarrow Grass Seeder

THE ROYAL WHEELBARROW SEEDER

For sowing light grasses, clovers, alfalfa, etc., there is no machine on the market equal to the ROYAL SEEDER. It is a difficult matter to sow the lighter grasses with any other style of machine and be sure of an even stand of grass, and it is next to impossible to sow the lighter grasses through the attachments on grain seeders. With the Royal Seeder you are sure to sow a perfectly even stand and being low down, close to the ground, the wind interferes very little with your work. With this machine grass seed is sown broadcast on top of the ground as it should be, then by following with the harrow the seed is covered lightly and evenly, just AS IT SHOULD BE. The hopper on this machine is 14 feet in length and it will sow 30 to 40 acres per day. The whole machine is VER LIGHT, weighs about 40 pounds, RUNS VER EASILY, can be regulated quickly and without trouble. We have sold a large number of these machines in the past and every one of them is giving perfect satisfaction. LASTS A LIFETIME.

ORDER A WHEELBARROW SEEDER AND SOW YOUR GRASS SEED RIGHT. See price list following.

CYCLONE GRASS SEEDER

These little seeders are very handy around a farm; they sow the light grasses and clovers very satisfactorily; on light grasses will do much better than the attachments on grain seeders. They will handle any kind of grain or seeds that require broadcasting. The price is low and every farmer should have one.

See price list following.

All prices on grasses and field seeds subject to market changes.

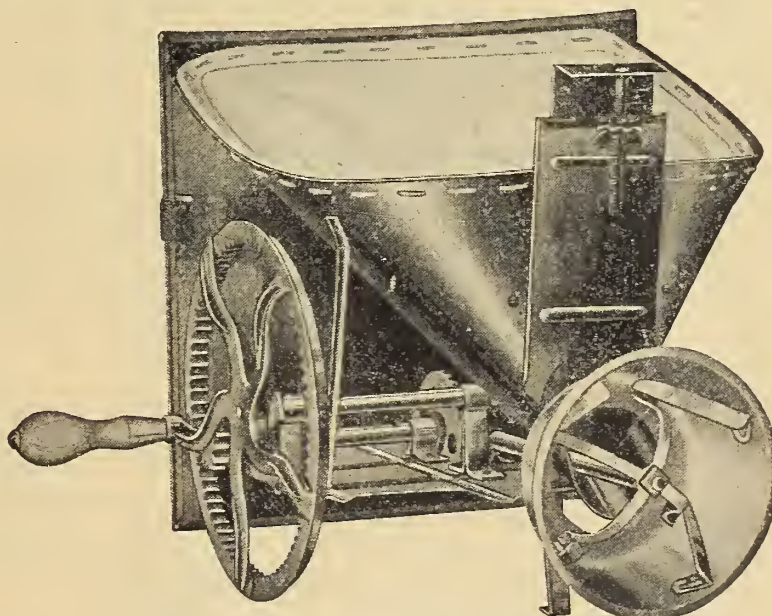

THE BLOCKI BROADCAST SEEDER

We consider this seeder the most durable and practical low priced broadcast seeder on the market. It is durable, strong and practical. Note the pressed steel frame. On this frame the bearings are riveted. The frame is then securely riveted to the back and hopper, and fastened with two braces. This absolutely accurate construction brings all shafts in line and makes the gears mesh all the way around. Shafts are cold rolled steel.

The gate on this machine can be accurately set to regulate the flow of seed. When set for a certain seed, it can be instantly closed or instantly opened again to the same position.

The Blocki Broadcast Seeder may be used to sow clover, timothy, millet, most grass seeds, rye, oats, barley, wheat, etc. See price list following.

Stockmen should read what we have to say on pasture grasses. It means money to the stockman.

Harvesting Marquis Wheat on farm of J. R. Marshal, Twin Falls, Idaho. This 25 acre field averaged 81 1-2 bushels per acre, graded No. 1 Northern. Think what it means to grow a hard wheat in this section under irrigation.

THE IMPORTANCE of RECLEANED and GRADED SEED GRAIN

There is a vast difference between just re-cleaned seed grain and our RECLEANED and GRADED grain. If you sow our kind that DIFFERENCE will be in YOUR POCKET next fall. We first reclean the grain like the other fellow does, only a mighty sight better, because we have the equipment and know how the job should be done. After it has been recleaned (the other fellow is through when he has recleaned it) we then grade it by special machinery, removing all weeds or wild oats if there are any; and also removing all light or imperfect grains, leaving nothing but the heaviest, most perfect kernels. We have the ONLY EQUIPMENT of THE KIND for doing this work in operation in Idaho at this time and besides WE KNOW HOW.

When you sow this RE-CLEANED and GRADED GRAIN you are sowing only perfect, plump berries which bring you healthy, strong plants which in turn bring large, even sized heads, no weak plants, no small heads. Now, do you see where that DIFFERENCE comes in? You can increase your yield from five to ten bushels, even more, per acre, by using the right kind of seed grain and we can supply you the right kind. Don't get the idea that it's all in the variety, a good straight variety is the only thing to sow, but there is more to the story.

Wheat MARQUIS

MARQUIS WHEAT is making good in Idaho, as it has done in every section where it has been introduced. It has been grown here at Twin Falls both under irrigation and on dry land, since 1912, and has never failed to make good. Succeeds either as a spring or winter wheat and is retaining its hardness and high milling quality from year to year.

Marquis wheat is a prize winner at every fair or exposition where it has been shown, and has never failed to carry off the highest honors.

PRODUCTIVENESS

Marquis Wheat has out-yielded all other varieties grown under the same conditions of soil and cultivation wherever tests have been made. We claim for Marquis that it will make better

average yields in Idaho than any other variety we know of. One of the best qualities possessed by Marquis is its tendency to run uniform and even, heads are practically all the same size and grain is always plump, heavy and of a fine dark red color. It is due to this uniformity that the average yields are so high.

QUALITY

Marquis has won prizes repeatedly as the world's BEST MILLING WHEAT. It is very hard and heavy, the heaviest weighing wheat known. Here at Twin Falls we have repeatedly grown Marquis to grade No. 1 Northern and that under irrigation. Think what it means to grow a first class hard wheat in this climate and under irrigation.

We strongly recommend Marquis for dry land, it is a good drought resister, a good yielder under all conditions and does not shatter.

See Farm Seed Price List herewith.

DICKLOW**THE MOST POPULAR WHEAT IN IDAHO**

This popular variety of wheat has been grown here at Twin Falls ever since the country was first settled. Its origin seems to be unknown, and though we have tried repeatedly to get its history, we have never been successful. That Dicklow is a wonderful variety of wheat is beyond question. Its yielding qualities are wonderful; we doubt whether there is a heavier yielding wheat than Dicklow in existence. In quality Dicklow is a very soft wheat and it will not grade as high as many other kinds, but it makes up for this in its yielding qualities. Dicklow has immense square heads, always well filled with large, plump berries. When allowed to stand after ripe this variety is inclined to shatter quite badly and is therefore not a good dry land wheat.

We have a very fine quality of re-cleaned and graded Dicklow this season.

See Farm Seed Price List herewith.

White Hulless Barley

Barley**HULLESS OR BALD BARLEY**

If the very high feeding value of this grain were better known, as it well deserves to be, it would be much more extensively grown in this section. Stock feeders are losing out on a good thing by not knowing more about Hulless Barley. No grain we produce here compares with

it in feeding value for the finishing of live stock; it will take the place of corn for that purpose. Hulless Barley is the heaviest grain known, weighs about 70 lbs. per measured bushel when well matured. It threshes out absolutely free of the hull, resembling wheat when threshed. It is free of beards and handles as easily as wheat. We have known it to yield over 30 bushels on dry land and as high as 80 bushels per acre under irrigation. Must be sown as early as possible in the spring to get the best yield. It is a very quick growing, short season grain, and there is never any trouble maturing it anywhere in this section, but it does not yield nearly as well if sown late. Sow at the rate of 100 lbs. per acre on irrigated land, lighter on dry land.

Price by mail to second zone: 50 lbs. \$3.00. See Farm and Grass Seed price list herewith for prices in larger quantities.

SPELTZ OR EMMER

A very high quality feed crop producing good yields of grain of high feeding value; fine for horses or hogs. A good drouth resister. Write for prices.

SPRING RYE

SPRING RYE makes an excellent crop to sow for quick pasture. We strongly recommend it for that purpose. It also is a good yielder and the grain makes good stock feed. On dry farms, where it is necessary to sow annual pasture, this grain is very valuable. Sow 80 to 90 lbs. per acre as early in spring as weather will permit.

This grain is very scarce this year. At the time we go to press we have no spring rye in stock; may not be possible to obtain it this season, but if it is to be had we will have it later. Write for prices.

Field Peas

Every farmer and stock man should be interested in FIELD PEAS. Next to corn, peas have a higher feeding value than any other grain.

The Canadian variety is the best known of all field peas; this variety has been grown for many years in Canada and the eastern part of our own country, where it is the principal crop for the finishing of live stock, including sheep, hogs and cattle. Peas are used in the sections mentioned for both hay and grain.

Write us for special information regarding the growing of FIELD PEAS. If properly handled will yield 40 to 60 bushels per acre in this country. Sow as early in spring as possible—the earlier the better. Sow at the rate of 120 lbs. per acre in same manner as you would sow grain.

The field pea crop in this section, due to the extremely hot weather the month of June, was a total failure for the first time in this section. Up to the time of going to press it has been impossible to obtain a stock at a price within reason. We hope to obtain some seed later. Write for prices.

Straight variety seed grain, re-cleaned and graded, will make enough increase in yield to much more than pay for the seed. You get more for your money in seeds than in any commodity you buy.

Silver King Corn

Order some of our fancy re-cleaned and graded seed grain.

The increased yield the first year will pay for the seed.

Seed Corn

IDAHO GROWN ACCLIMATED

We are offering the best Idaho grown seed corn this year that it has ever been our pleasure to handle. It was all grown right here in Twin Falls county and has been grown here for several years. This corn, grown at our elevation, should be adapted to any section of this western country. Our stock is carefully selected and grown from the best strains brought to this section by ourselves in the past.

CASSIA COUNTY FLINT

This is a large eared strain of the Australian White Flint variety that has been grown in this section for a considerable number of years becoming perfectly acclimated. A very heavy yielder, very early and hardy, it never fails to mature. There are very few localities in Idaho where Cassia County Flint will not mature and make a good big crop of corn. If you want a safe corn in most any locality plant this variety. Requires 8 to 10 pounds to plant an acre. See seed corn price list.

SILVER KING OR WISCONSIN NO. 7

Silver King corn was originated by Prof. Moore of the Wisconsin Agricultural College, several years ago, and is the favorite among corn growers over a large section of the corn belt. This corn brought the average corn yield of Wisconsin above that of the best states in the corn belt. Silver King does exceptionally well in Idaho, the best specimens of Idaho corn that we have ever seen were of this famous variety. Our advice to Idaho corn growers is to try this variety.

Description—Ears 8 to 9 inches in length, always well filled out clear to the tips, very uniform in size and type. Kernels of good length, set in straight even rows. It has a decided tendency to set two ears to the stalk, which is one reason for its good yielding qualities. We believe this corn will out-yield any other variety in this section.

Silver King is maturing here year after year. Our stock of this variety is particularly fine and of the very best strain. See seed corn price list next page for prices.

MINNESOTA 13

This is, without doubt, one of the earliest Yellow Dent corns in existence, a 90 day variety. Our stock is the best strain, we brought it into this section several years ago, it has been maturing here right along ever since and has become thoroughly acclimated.

Description—Ears average about 8 to 9 inches in length and of handsome appearance. Kernels very deep and a bright rich yellow color. A good yielder and sure to mature if we have anything like our usual season. Grows stalks of good height and makes a good silo corn for this section.

See seed corn price list below.

Vetch

SPRING VETCH

One of the best of forage plants. Very valuable for a quick pasture or for a first year hay crop. This is a species of pea and is grown very extensively on the Pacific coast. It furnishes an abundance of excellent feed, either green or cut and dried for hay. The seed should be sown mixed with some variety of grain in order to hold up the crop. Sow about 60 to 80 lbs. per acre with a half to a bushel of grain.

Sand Vetch

Vetch is a wonderful soil fertilizer, none better in some cases the soil requires inoculation to produce best results. Sow as early in spring as possible, the earlier the better. See price list.

SAND OR WINTER VETCH

This variety thrives on poor, arid and sandy soils. It is sown in the fall or early spring and is generally mixed with grain to support it and keep it off the ground. Grows to a height of four or five feet and can be cut twice, first for hay as soon as the bloom appears, and later for seed, or it can be pastured up to about June and then let go for seed. Perfectly hardy and makes fine hay and pasture. One of the very best of fertilizers. From what we have seen of Sand Vetch in this section we are satisfied it will pay well as a seed crop. Sow broadcast 30 to 40 lbs. per acre, early as possible, and about 5 inches deep. See price list following.

Rape

DWARF ESSEX

Largely grown in the northern United States and Canada. It is excellent for sheep pasture and also for soiling. It may be sown in May and be ready for pasturing in July or August, or it may be sown in June or July and yet furnish a large amount of pasture or fodder. in drills sow 5 lbs. per acre; broadcast, sow 10 lbs. per acre.

See price list following.

Feterita

THE GREAT DRY LAND FEED CROP

HERE IS SOMETHING FOR THE DRY LAND FARMER THAT SHOULD PROVE A SURE WINNER.

A new non-sacharine sorghum, maturing its crop 20 to 30 days earlier than Kaffir Corn, making it well adapted to sections with short seasons. FETERITA grows about 6 feet tall, branching freely from the roots and producing numerous large heads of white grain.

It is a most remarkable drouth resister, producing a crop when all other kinds of fodder fail. The grain is excellent for feeding chickens and all other kinds of stock. Sow 5 lbs. of seed per acre in rows and handle exactly as you would a crop of drilled corn.

Apparently does not need much of any moisture but needs plenty of cultivation. All dry land farmers should give it a trial. It will fill the need of a good feed crop.

See price list following.

Kaffir Corn

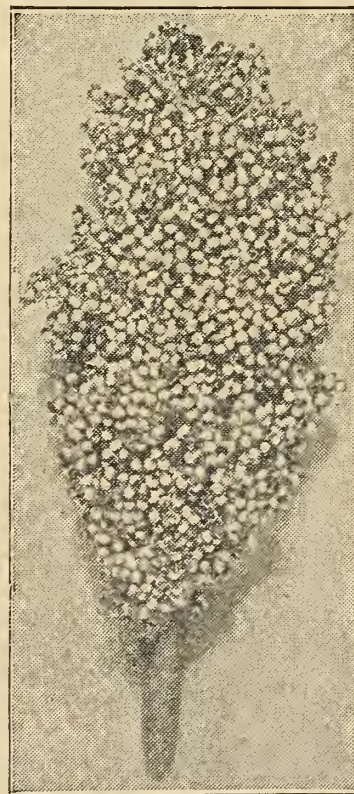

Grows 4 to 5 feet high, the stalks bear an abundance of broad leaves; stalks are brittle and juicy, not tough and hardening like other varieties of sorghum. It makes excellent fodder either green or dry, which is very much liked by all kinds of live stock. The seed crop is heavy and makes valuable feed for stock and poultry. For grain sow in drills 3 to 3½ feet apart and handle as you would a corn crop. For fodder sow broadcast 30 to 60 lbs. per acre. Does not require much moisture and will not ripen if watered too heavily.

See price list following.

MILO MAIZE

Similar to Kaffir Corn and its habits or growth and manner of handling are the same. A heavier seed producer than Kaffir Corn and the grain has a higher feeding value. The fodder is not particularly valuable, being tough and woody and stock do not like it.

See price list following.

Feterita

BROWN DOURRHA

Similar to Milo Maize but producing larger seed heads. Inclined to branch and produce several heads to the stalk. A great drouth resister. Well worth a trial and especially on dry land. Write for prices

Sugar Cane or Sorghum

As a fodder crop cane furnishes an enormous amount of good feed. It can be successfully grown in all parts of the United States and here in Southern Idaho it grows to perfection and the seed can be matured very successfully. An excellent crop to sow where an abundance of stock feed is wanted the first season. We particularly recommend CANE to settlers on new land as it will give them an abundance of fodder the first season. Stands drouth well. If sown for hay at least 50 lbs. of seed should be sown per acre broadcast, and if ground is very strong more seed should be used to keep crop from growing too coarse. In drills sow 10 to 15 lbs. per acre.

See price list following.

Soudan Grass

THE GREAT FORAGE CROP FOR THE DRY LAND FARMER.

A wonderful drouth resisting grass largely grown in West Texas and Oklahoma for hay. Will thrive in sections where rainfall is not sufficient to produce other kinds of grass or fodder. SOUDAN is an annual grass and must be re-seeded every year. The plants under favorable weather conditions grow to a height of 6 to 10 feet high. It frequently produces 20 or more stalks to a plant. The stems are unbranched, seldom larger than a lead pencil and covered with an abundance of leaves. It is easily cured, making hay of excellent quality, which is readily eaten by all kinds of stock.

SEEDING—Sudan grass should not be planted until the soil becomes warm in the spring. SOUDAN GRASS can be sown in rows 18 to 42 inches apart and cultivated like corn, or it can be drilled in with a grain drill or sown broadcast by hand. In the semi-arid regions it is more profitable to seed in rows and cultivate. The rows should be as close together as the tools available for cultivation will permit. Seeded in rows 36 to 42 inches apart, 2 to 3 lbs. of good seed per acre is sufficient. In rows 18 to 24 inches apart 4 to 6 pounds, and drilled or broadcast, 16 to 24 pounds per acre are required.

HARVESTING—Sudan Grass is easy to cut with a mower and cures readily, so that the haying process is much the same as any other grass. Where it is harvested for seed an ordinary grain binder is best suited for handling the crop. When cut for hay it is best to cut just after full bloom, so that it will have as much time as possible for a second growth. It is interesting to note that while Sudan Grass is very drouth resisting and makes good yields in dry sections, it also does exceedingly well under irrigation and under the latter conditions makes enormous yields of hay.

See price list following.

Field Beans

The bean growing industry is one of great importance to Southern Idaho, and growing more important from year to year. It has been found that this section can successfully compete with Michigan and California on beans. Where properly grown beans yield very heavy in this section and are proving a profitable and inexpensive crop to handle.

In sections where there is danger of water shortage we strongly recommend the growing of beans as they require very little irrigation. We have known good crops of beans to be raised in this section with no irrigation.

It is very important that a good quality of seed be planted as poor or mixed stock is not marketable or if they can be sold must sell at a discount.

Commercial Beans are a good crop for Idaho—A good crop for the small and the large farm.

How to Handle the Bean Crop

Since beans have been attracting so much attention in this section, we are receiving many inquiries as to how the crop should be handled. Since we have grown large acreages of beans ourselves, also large acreages under contract in past years in this section, we feel qualified to advise our customers on this subject.

To start with, it is well to remember that beans require a settled but well cultivated seed bed. The right kind of seed bed can best be obtained by plowing the ground thoroughly in the fall of the year, first water the ground before plowing. If plowed in the fall the soil will settle naturally and sufficiently during the winter. As soon as spring opens and soil is dry enough to work, harrow thoroughly but not too deeply with a spike tooth harrow. Do not use a disc or spring tooth harrow for this work, as such tools will loosen the soil too deep and overcome the natural settling which has taken place during the winter. Repeat this harrowing every ten days or two weeks, to kill all young weeds that are starting and conserve the natural moisture.

If it has been impossible to plow the ground in the fall, plowing should be done first thing in the spring, following immediately with the harrow and handled as outlined above. Planting should be done about the 15th to 20th of May. Before planting, ground should be thoroughly irrigated unless you are sure that the soil and sub-soil are thoroughly moist and in good condition to carry the crop to the blossoming period without further watering.

Plant or sow about 60 lbs. of good clean beans of straight variety (if seed stock shows any mixture whatever it should be hand picked) per acre, using a grain drill properly regulated to sow evenly. Do not plant too deep, just deep enough to get the seed in moist soil and following the seeding with a light harrowing. After the crop is well through the ground it should be harrowed lightly to kill all young weeds that may be starting in the rows. Beans should be planted in rows, by stopping up the hose of the drill to proper widths. 28 inches apart is a good distance for beans, but if you have a proper adjustable cultivator for handling the crop they will stand closer planting if desired. Cultivate the crop thoroughly to keep down the weeds and conserve moisture. Weeds must not be permitted to grow in the crop or they will greatly reduce the yield and may injure the quality of the crop.

It is impossible to lay down rules for the watering of beans, or any other crop. The soil should be kept in a moist growing condition, but do not over-water at any time or you are apt to greatly injure the crop.

It is well not to water after beans begin to set on the vines, but there should be sufficient moisture in the soil, applied before that time, to carry the crop to maturity. When the pods are nearly all ripe, cut the crop with a sled cutter beneath the ground or with a regular bean cutter built for the purpose. As fast as the crop is cut it should be bunched up with forks in pretty good sized piles and threshed or stacked as soon as dry. Threshing should be done with a regular bean thresher, not with a grain thresher, unless the latter has been geared down very low to prevent splitting. If these directions are followed you should get a profitable crop of beans running from 20 to 40 bushels per acre.

Commercial or white field beans are proving one of the big money crops in the Twin Falls section and they are as stable as wheat in the markets.

If we have overlooked any points on the growing of the crop on which you desire further information, write us and we will be glad to explain further.

LADY WASHINGTON BEANS

This is a variety of white navy somewhat larger than the old fashioned Navy and is the bean most commonly grown in this section as a commercial bean. It is a bean of very fine quality and a good yielder. This bean takes well in our market. Our seed stock of Lady Washington is very fine and pure. See price list following.

MICHIGAN PEA BEANS

This is the bean most commonly grown in Michigan and other eastern bean growing districts. It has been grown quite extensively in the Twin Falls bean district for quite a number of years and does remarkably well here. The yield of this variety runs about the same as the Lady Washington but it matures ten days to two weeks earlier. The appearance is very attractive, it is pure chalky white in color and the quality is very fine. Sells on the commercial market the same as Lady Washington and is preferred in many districts. We recommend the Michigan Pea Bean for sections where the season is short.

See price list following.

RED MEXICAN

Or Mexican Chili as it is sometimes called, is a red bean of very heavy yielding qualities and sells well in some sections. We would not advise the growing of this bean on an extensive scale, but if kept free from mixing with other varieties, limited quantities can be handled to advantage and money made from growing it. It out-yields the white beans considerably and is very early.

See price list following.

Millet

GOLDEN

An annual quick hay, or forage crop of great value, where hay or feed is needed the first season from sowing there is nothing better than Golden Millet. In this section it will yield 4 to 5 tons of the very finest hay per acre. Can be sown as late as July or the forepart of Aug-

ust and will mature a crop of hay or of seed in 60 to 70 days from sowing. Used very extensively in most parts of the country as a catch crop where other crops have failed. Sow 30 lbs. of seed per acre broadcast.

Write for prices.

HOG OR BROOM CORN MILLET

Also called PROSO and DAKOTA Millet. This is a crop that certainly deserves to be more extensively grown. We have no more valuable grain producer for this section. The grain is very rich and oily, possessing a very high value as a fattening or finishing feed for hogs or other stock. It is so rich that it is not advisable to feed it straight but should be fed mixed with other grains. If you are a hog feeder, try an acreage of Brown Corn Millet, it will help solve your finishing problems. Very valuable as a poultry feed, everyone should raise a patch to provide winter feed for the poultry.

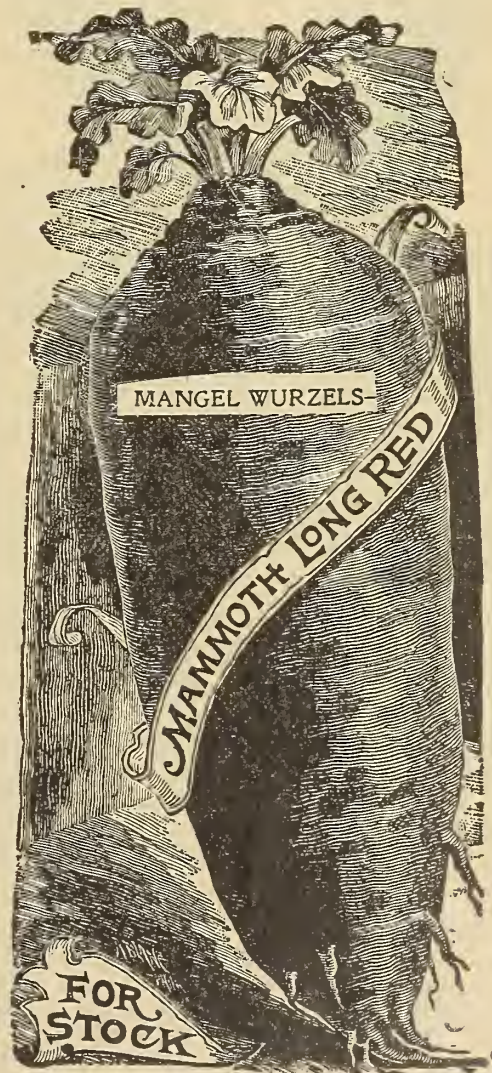

Broom Corn Millet is an immense producer of seed, has been known to yield as high as 100 bushels per acre. Easily grown and handled, simply sow broadcast at the rate of 40 lbs. per acre, handle, harvest and thresh like any crop of grain. Can be sown any time from May first to the middle of July, but we recommend early sowing for best results.

Price: 1 lb. 20c, 5 lbs. 60c, 10 lbs. \$1.00, postage paid to second zone. If wanted in larger quantities see Farm Seed price list herewith.

Flax

Some of our customers are becoming interested in Flax, and we can assure them that this grain does well in this section. It has been tried here in several instances and appears to yield excellently. We believe it will greatly out-yield the big flax growing districts.

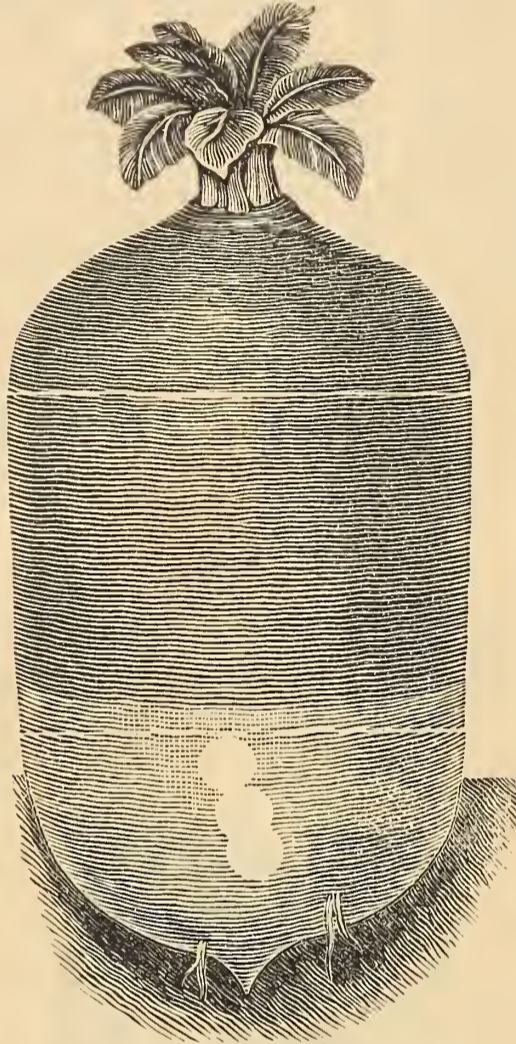

Price: 1 lb. 25c, 5 lbs. 80c, 10 lbs. \$1.50, postage paid to second zone. If wanted in larger quantities write for prices.

Stock Beets or Mangels

Every farmer and stock man should grow MANGELS extensively and if their value was fully realized there would be a good field of mangels on every farm in this section.

MANGELS ARE THE CHEAPEST STOCK FEED THAT YOU CAN GROW, AND THEY

Golden Tankard Mangel

POSSESS A VERY HIGH FEEDING VALUE. MANGELS ARE BEING PRODUCED IN THIS SECTION AT A COST OF LESS THAN \$2.00 PER TON. COMPARE THIS WITH THE COST OF HAY OR ANY OTHER FEED.

All kinds of stock relish mangels, and do well on them. Many farmers in this section are using mangels to feed their hogs and thereby greatly reducing the cost of production and many more, realizing the profit to be made, are going to sow mangels the coming season. With mangels and a little grain, hogs can be produced at less cost than in any other known way.

SHEEP, CATTLE AND ALL KINDS OF STOCK DO WELL ON MANGELS and they reduce the feeding expense to a minimum. Every **FARMER** and **STOCKMAN** should be interested in growing mangels.

There is no place where mangels grow to better advantage or produce heavier than in this section. A good crop will run from 25 to 40 tons per acre. A number of growers have produced the latter amount here. **THINK WHAT IT MEANS TO PRODUCE A FEED CROP OF THAT SIZE.** Think how cheaply you could feed your stock with such a crop.

Crop should be sown in April or May in deep well plowed ground. We favor the early sowing. See that ground is moist before planting; this is important. If ground is dry, irrigate before sowing. Seed will germinate quicker if sown shallow. Sow at the rate of 10 lbs. per acre in rows wide enough apart to cultivate. Unless you can get a regular beet drill, a good

garden drill is the best for sowing this crop.

Our mangel seed is the best imported stock and our prices are right. We import our own mangel seed and sell more than any house in the west. On account of conditions in Europe mangel and beet seed is liable to be scarce and go to high figures before the season is over. **BUY EARLY.**

DANISH SLUDSTROP

This new mangel has attained the highest honor in agricultural circles in Denmark, where mangels are as important a crop as corn or grain in this country. Sludstrop has a long reddish-yellow root, growing more than half above the ground and is easily harvested. It excels any other variety in weight and yield, has a very high feeding value. Our seed is from one of the most reliable Danish growers.

Price list following.

GIANT LONG RED—MANGEL

This is perhaps the heaviest cropping and largest of all MANGELS. The roots grow from one-half to two-thirds above the surface and are frequently two or more feet in length by six to eight inches in diameter. Has good feeding value—one of our best sellers.

See price list following.

GIANT RED ECKENDORF

The most popular variety of MANGELS in Germany and Denmark being planted there more than any other variety, but it is also giving as good results in this country wherever grown. Roots are smooth and cylindrical like the Golden Tankard, flesh firm and of very high feeding value. A **WONDERFUL YIELDER**—easily harvested on account of growing well out of the ground.

See price list following.

GIANT ROSE HALF SUGAR MANGEL

Combines the large size and heavy yielding qualities of the Mangel with the high feeding qualities of the Sugar Beet. Grows well out of the ground and is easily harvested. One of the best for fattening on account of its high sugar content. Red in color, flesh very white.

See price list following.

GIANT WHITE HALF SUGAR

Very similar to the ROSE HALF SUGAR except that roots are pure white and seem to run a little larger. We think this variety will yield heavier than the Rose Half Sugar and it is proving a favorite with our customers wherever tried.

See price list following.

GOLDEN TANKARD

A splendid variety and a great favorite with many growers, on account of its manner of growth and ease of handling. Yellow in color, as the name indicates, stump rooted, standing well above the ground, it is very easy to pull. Has a high feeding value and is perhaps the best mangel of all for feeding dairy cows.

See price list following.

GARDEN SEEDS

We take particular pride in our garden seed department. Our seeds are the VERY BEST MARKET GARDENER'S STRAIN that we can obtain. Our trade on garden seeds is growing very rapidly, a big increase in trade every season. The finest gardens in the Twin Falls country, and there are none finer anywhere, are grown from our fine bulk garden seeds.

We carry but one grade of seeds and you can not get better no matter where or from whom you buy.

If you knew that you could get as good seeds in your own section as you can get anywhere on earth and at no greater cost, you would not send a great distance for them. Give us a trial and we will convince you that you can be served as well AT HOME. Don't send your money clear out of your own country, but keep it at home and help build up an industry that will benefit your own section.

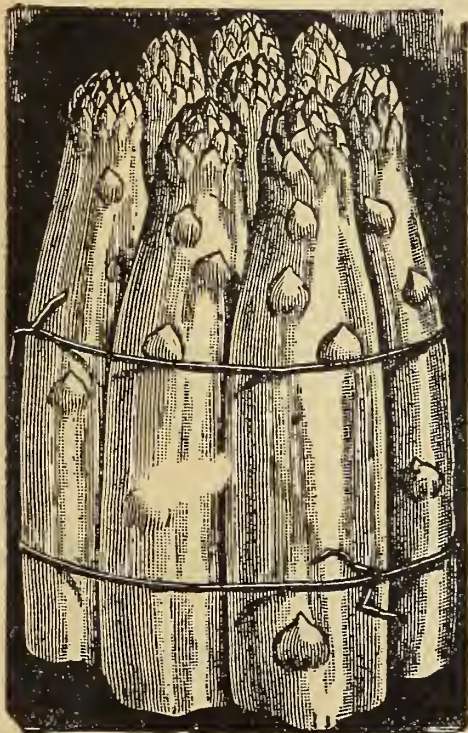

In garden seeds we aim to carry varieties that are best adapted to our climate and conditions.

Artichokes

GREEN GLOBE

The seed may be sown indoors and plants potted same as tomato and transplanted to the garden as soon as weather is warm or seed can be sown outside in hills and thinned to one plant in a hill. Grown for unripe flower heads, which are cooked same as asparagus. Considered a great delicacy. Packet 10c, oz. 30c.

Asparagus Seed

Columbian White Asparagus

When an asparagus bed is started from seed, the seed should be sown in the open ground in early spring and plants transplanted to the permanent bed when one year old. One ounce of seed will sow 50 feet of row. Asparagus grows to perfection in Idaho.

COLUMBIAN MAMMOTH WHITE

Gives immense yield of clear white shoots. A valuable variety. Shoots remain white without earthing or artificial banking.

GIANT ARGENTEUIL

Is a selection from imported French Argenteuil stock. An improvement upon the original. The largest and finest quality asparagus known. Green in color. We recommend Argenteuil.

PALMETTO

The most profitable asparagus on the market. A good yielder. Green in color, and of fine quality.

ASPARAGUS ROOTS

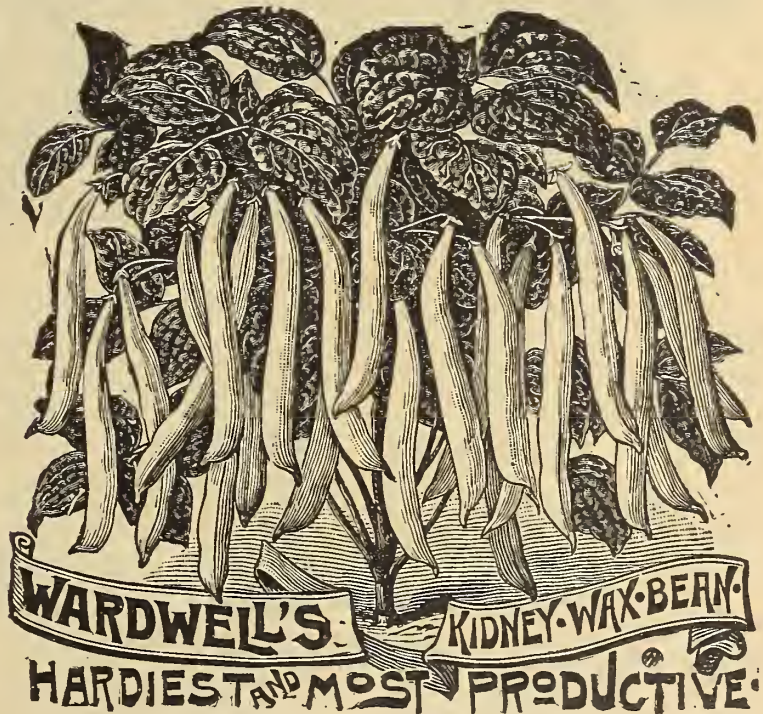

By far the most satisfactory way to obtain an asparagus bed is to set out the roots. It takes three years to secure a bed from seed, but with large strong roots such as we will be able to supply you, a bearing bed can be had in from one to two years. We will have roots ready to set in April or May. Write us stating the number wanted and we will be pleased to quote you prices.

Beans

Culture—About May first or soon as danger of frost is past and ground is warm, plant in drills 18 inches to 2 feet apart and cover lightly. Cultivate well to keep down weeds. Sow about every two weeks during spring for succession.

NOTE — WE SELL BEANS, PEAS AND SWEET CORN CHEAPER THAN ANY OTHER HOUSE WE KNOW OF. We price by the POUND, others price by pint and quart. A pint DOES NOT WEIGH A POUND or a

QUART TWO POUNDS, BEAR THIS IN MIND WHEN ORDERING AND COMPARING PRICES. We grow our own beans.

GREEN POD VARIETIES

BURPEE'S STRINGLESS

The finest green pod stringless bean. Earliest and hardiest of all green pod sorts, produces large handsome pods. Perfectly stringless. A very heavy yielder. Pods fleshy, of very fine flavor.

See price list following.

EXTRA EARLY RED VALENTINE

(Round Pod). Pods are usually ready to pick in about 50 days from planting. A very fine quality bean, crisp and tender.

See price list following.

REFUGEE OR 1000 TO 1

A very heavy yielding bean, exceedingly hardy. The pods are long, round and of excellent quality. Continues in good condition to use longer than most any other bean.

See price list following.

FLAGOLETTE WAX

Used as a green shell bean and very desirable for that purpose. Plants dwarf and bushy, beans mature quite early.

See price list following.

PROLIFIC BLACK WAX

The earliest of the wax beans. Vines medium sized, vigorous and hardy, pods round and fleshy. Remain for some time in condition for use. A splendid bean and a favorite with our trade. Very tender.

See price list following.

PENCIL POD BLACK WAX

One of the finest garden beans on the market. As near stringless as a bean can be and of exceptionally fine quality. Very long fleshy yellow pods, the pods sometimes measure 8 to 9 inches in length. Yields equal to any garden bean that we have ever seen. A great bean to

use for canning for winter use. We strongly recommend Pencil Rod Black Wax. See price list following.

IMPROVED GOLDEN WAX

A splendid improvement over the popular Golden Wax. Pods are very uniform and of a bright golden yellow, about four to five inches long and rather flat. Pods meaty, tender and stringless.

See price list following.

WARDWELL'S KIDNEY WAX

The strong vines yield abundantly, long, nearly straight, broad, creamy white pods. They are of very fine quality and a fine variety for market gardeners. Matures just a little later than Golden Wax. We strongly recommend this bean. See price list following.

We Sell Beans

Peas and

Sweet Corn

Cheaper than

any other house

we know of

See what we

have to say on

the subject and

compare our

prices with

others.

DWARF HORTICULTURAL

Absolutely stringless, pods are of medium length, slightly curved, and when nearly developed are freely splashed with bright red on the yellow skin. The green shell-beans are of good size, tender, and of fine flavor. A very fine bean.

See price list following.

Dwarf or Bush Lima Beans

BURPEE'S BUSH LIMA

Plants grow 18 to 20 inches high, of stout erect growth, pods large and well filled with large, even sized beans, a heavy yielder. This Lima is fully equal to the pole sorts of similar size and much more convenient to handle.

See price list following.

HENDERSON'S BUSH LIMA

Grows erect 18 to 20 inches tall, requires no support. Very early and productive. Beans have the true Lima flavor, buttery and tender. Matures at least two weeks earlier than the pole limas. This is an exceptionally good bean for this section.

See price list following.

Pole Beans

KENTUCKY WONDER OR OLD HOME-STEAD

Vines vigorous, climbing well; very productive; pods green, very long, often reaching 9 to 10 inches, very crisp and tender. This is a great favorite as a snap bean.

See price list following.

LAZY WIFE

One of the most productive and easily gathered of the pole beans. Very fine flavor, a fine green snap bean and equally good as a dry shelled bean for winter use. Pods very long, practically stringless and tender.

See price list following.

CUT SHORT OR CORN HILL

Popular variety for planting among corn, thus doing away with poles. An excellent snap or dry shell bean. Used green extensively for succotash.

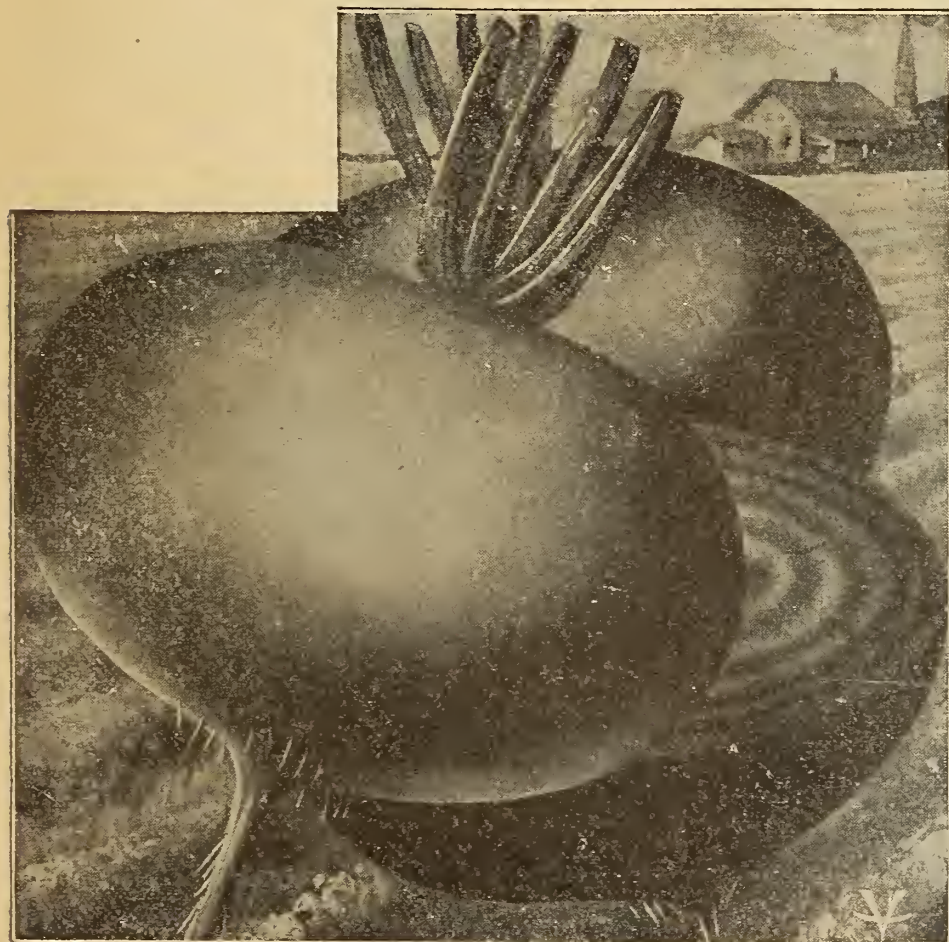

See price list following.

TESTED SEEDS insure a good garden. Use Darrow's Choice Tested Seeds.

If you are beyond the second zone add postage on beans in one pound to ten pound lots at rates shown under Parcel Post Instructions in front of Catalog.

Remember we can mail 70 lbs. in first and second zones—up to 150 miles in a straight line from Twin Falls. Outside second zone 20 lbs. is the weight limit.

Edmund's Blood Turnip Beet

Beets

EXTRA EARLY EGYPTIAN

The well known early variety, an old favorite. Color dark red, shape flat, quality excellent.

See price list following.

ECLIPSE

A choice early variety, well known and popular. Shape globular, quality good, color bright red. An excellent early beet.

See price list following.

EDMAND'S BLOOD TURNIP BEET

The best sort for a general crop. In quality one of the finest. Color very dark red, shape globular, having only one tap root. Very popular with market gardeners.

See price list following.

DETROIT DARK RED BEET

One of the finest garden beets known. Quality very fine. Color very dark red. Size medium and uniform. No finer beet for home use. We strongly recommend Detroit Dark Red.

See price list following.

SWISS CHARD

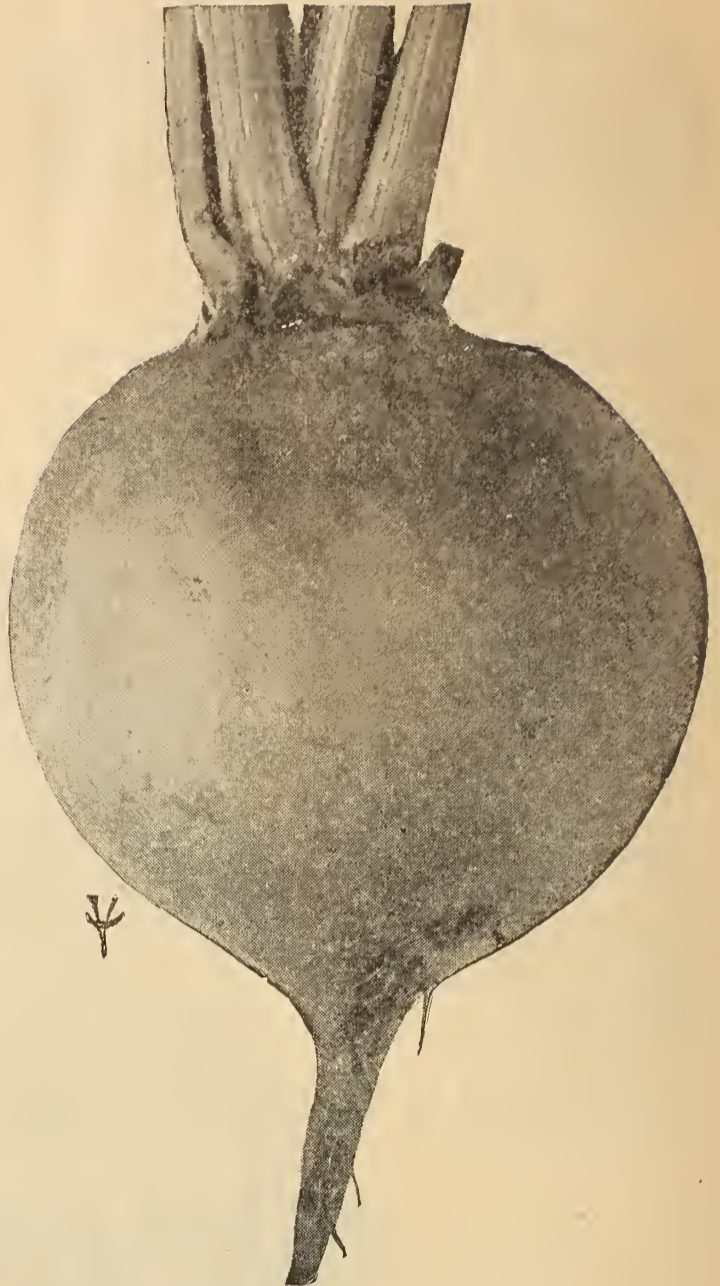

A beet producing leaves only, of a quality far surpassing the leaves of any ordinary beet for greens. Very crisp and tender. It is considered by many as far superior to Spinach for greens. The leaf stems are used same as asparagus and are excellent. Cultivate same as ordinary beets or spinach. If you like greens try Swiss Chard.

Copenhagen Market Cabbage

Brussels Sprouts

Grow same as cabbage or cauliflower. Used in same way as cauliflower. The crisp tender heads are very delicious.

DWARF IMPROVED

A variety producing compact sprouts of excellent quality. Pkt. 10c, oz. 25c. One ounce of seed will sow about 200 feet of drill. Excellent for greens.

Cabbage

Methods of growing cabbage are so generally understood that explanation is unnecessary. The most important point to bear in mind is to have the soil as rich as possible. You will never get it too rich.

EARLY JERSEY WAKEFIELD

This is an old standard favorite sort. Our seed is selected strain, the best stock we can obtain. Wakefield is one of the earliest varieties known. Heads pointed. See price list following.

COPENHAGEN MARKET

This is a new cabbage that is proving the most popular variety brought out in years. It is the finest round head early variety in cultivation, without a doubt. Heads very solid and heavy. Quality extra fine. We introduced this cabbage in this section two years ago and we have never had anything that gave our customers better satisfaction. We strongly recommend COPENHAGEN MARKET.
See price list following.

EARLY SUMMER

About ten days later than Jersey Wakefield. Heads round, remains a long time without bursting. An all around good second early cabbage.
See price list following.

EARLY DWARF FLAT DUTCH

An early cabbage of good size. Heads flat and very solid. Good both as an early and a late cabbage.
See price list following.

EARLY WINNIGSTADT

An early variety of excellent quality. Heads pointed but very solid. Not quite as early as Wakefield but a larger cabbage. A splendid standard sort.
See price list following.

SUREHEAD

A favorite old standard winter sort. One of the surest headers of all varieties. It has been popular for years and still retains its popularity. Heads solid and firm and a splendid keeper.
See price list following.

PREMIUM LATE FLAT DUTCH

This variety of late cabbage is a standard, well known sort in all sections and is a general favorite for winter use. Flat Dutch has retained its well deserved popularity for years. Large solid flat heads and a good keeper. Ours is the best of selected seed.
See price list following.

LARGE LATE DRUMHEAD

This is a very large late variety, very solid, flat heads, seldom bursts and a good winter keeper. An old favorite.
See price list following.

DANISH BALL HEAD

The best late cabbage yet introduced. Heads hard and solid, fine garined and tender. Heads round, medium sized, but very heavy and solid. A great favorite in all markets. If you are raising cabbage for market we strongly recommend Danish Ball Head. Our seed of this variety is the finest imported strain.
See price list following.

HOLLANDER

Similar to above in every way. This is a short stemmed variety. Possesses all the good qualities of the Danish Ball Head. Our seed of Hollander is a particularly fine strain, the finest we can obtain, and we advise that you give it a trial.
See price list following.

ROCK RED

This is the best variety of Red Pickling cabbage. Very dark red, solid heads.
See price list following.

Carrots

Sow as early in spring as ground is in good shape for cultivation. It has been found that in this section it is best to sow early while the natural moisture is in the ground. If impossible to sow early, ground should be irrigated before seed is planted. The carrot is a difficult plant to get started and if ground is allowed to crust over them they will not grow. Sow very shallow, about 2 to 3 lbs. per acre.

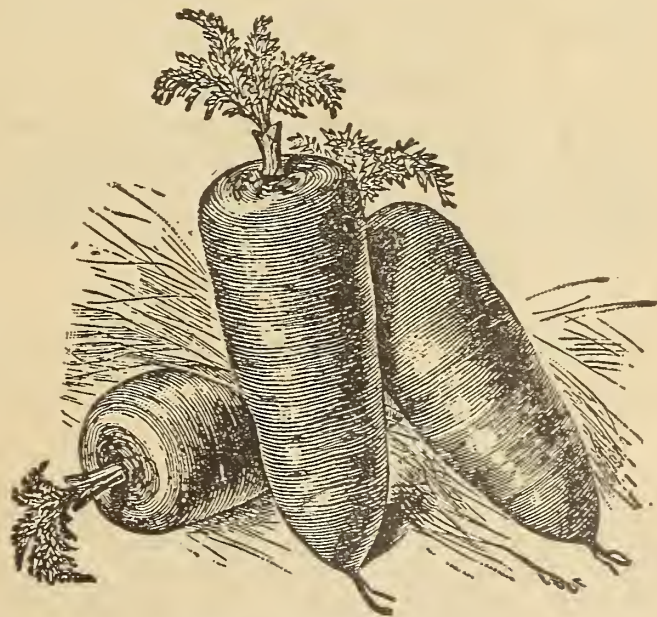

In this section carrots are grown extensively for feeding purposes, and when properly handled make easily 20 tons per acre of the best feed imaginable. Carrots are particularly valuable as hog feed, and no feed could be produced cheaper. All stockmen in this section should grow carrots.

EARLY SCARLET HORN

Excellent for early planting for garden use. Grow just the right size, tops small, quality very fine, color rich orange. See price list following.

DANVERS HALF LONG

Tops medium sized, roots medium length but uniformly stump rooted. A heavy cropper. A great favorite with our trade as a stock carrot and also fine for table use. See price list following.

Early Scarlet Horn

OX HEART OR GUERANDE

Tops small, roots short but very thick, often running 5 to 6 inches in diameter. On account of the ease with which it can be harvested Ox Heart is a favorite with many of our customers as a field carrot. See price list following.

Danvers Half Long Carrot

LARGE ORANGE BELGIAN

Strictly a stock carrot, too coarse for table use. A very heavy yielder. Roots grow long and deep. See price list following.

YELLOW GIANT

A new stock carrot from Australia, claimed to be the most productive of all stock carrots. It is a medium long variety, with an immense broad shoulder, stands well up out of the ground and is easily harvested. Any farmer wanting a big yield of carrots should try Yellow Giant. See price list following.

Cauliflower

Culture—Cauliflower is handled in the same way as cabbage. Needs plenty of moisture. We have never known any place where cauliflower thrives better than in Southern Idaho, nor have we ever known finer quality. We look to see cauliflower grown here as a great market crop and it could not fail to pay well.

EARLIEST DWARF ERFURT

This is a first class cauliflower, very early. One of the best and surest to head. A fine old standard sort. Our seed is the best French stock. See price list following.

EARLY DANISH SNOWBALL

Very early, medium sized heads. This is the finest all around variety known. Our seed is imported stock of the finest strain. See price list following.

DANISH DRY WEATHER

Similar to Danish Snowball. A very sure heading variety of superior quality. Stands dry weather exceedingly well and equally good for all kinds of weather. Highly recommended as a market gardener's sort. See price list following.

PRICE LIST—CAULIFLOWER

Parcel Post—Postage paid in All Cases

Danish Dry Weather	20c	2.50

Danish Snowball

Celery

We have never seen finer looking or better flavored celery than is produced in the Twin Falls country. Some of our customers are now producing it quite extensively for market and it is proving a highly profitable crop. We predict that in a few years this will be a great celery producing district. Our soil and irrigation are singularly adapted to celery growing.

GOLDEN SELF BLANCHING

The best of all early self-blanching varieties. It is ready for use very early in the season, blanches easily. Dwarf compact habit of growth, thick heavily ribbed stalks which blanch a waxy yellow. Flavor very fine. Imported stock. See price list following.

WHITE PLUME

This is the earliest and most easily blanched, but does not keep well after being taken from the trenches. Plants grow rapidly and blanch easily during the summer months. Good as an early market sort. See price list following.

GIANT PASCAL

This is a green leaved variety developed from Golden Self Blanching and is an excellent sort for fall and winter use. It blanches to a beautiful yellowish-white color. Solid, crisp and of a fine nutty flavor. A fine market sort and a good winter keeper. Imported stock. See price list following.

Giant Pascal Celery

WINTER QUEEN

This is without doubt the most valuable variety of celery for winter use yet introduced. A late winter keeper. It is much stouter, thicker and heavier, with double the amount of heart, of any known celery. We strongly recommend Winter Queen as a winter market sort. See price list following.

Sweet Corn

NOTE—WE QUOTE SWEET CORN BY THE POUND. OTHERS QUOTE BY THE PINT AND QUART. PLEASE BEAR IN MIND THAT A PINT DOES NOT WEIGH A POUND. OUR PRICES ON SWEET CORN ARE AS LOW AS QUOTED BY ANY HOUSE WE KNOW OF AND STOCK IS THE BEST ON THE MARKET.

GOLDEN BANTAM

A very early sweet corn with golden yellow grain, very tender and of excellent quality. Ears are about six to seven inches long, of the medium size most suitable for table use. The flavor is exceptionally rich and delicious. Our stock is carefully selected. See price list following.

HOWLING MOB

This is a new sweet corn EXTRA EARLY. Has the advantage of producing large ears like the later varieties and at the same time is extremely early. Ears 7 to 9 inches long, with 12 to 14 rows of pearly white grains. Quality very fine. A very fine crop for market gardeners as well as for home use. See price list following.

EARLY MINNESOTA

An old standard early variety. Has held its popular position for a long period of years as a very dependable sort. Ears good sized and of very fine quality. See price list following.

EXTRA EARLY WHITE MEXICAN

Very early, sweet and delicious. Ears about 8 inches long, superior in quality to any other extra early variety of equal size. This is a great favorite with our trade. See price list following.

EARLY EVERGREEN

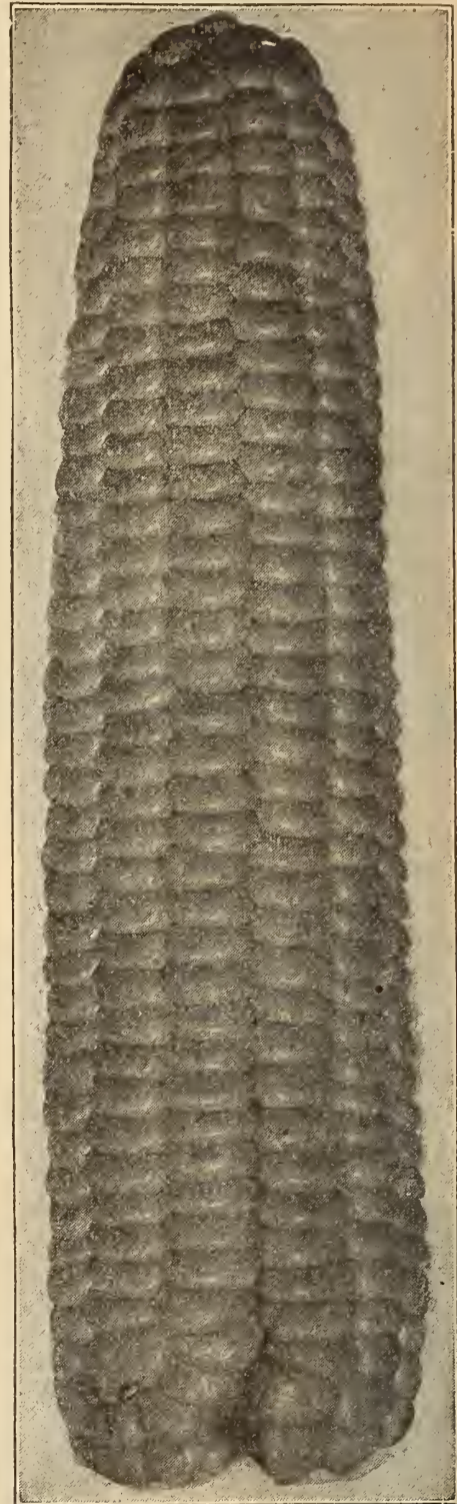

Slightly smaller ears than Stowell's Evergreen but fit for table several days earlier. Ears seven to eight inches long, with 16 to 20 rows and very deep grain of the finest possible quality. A standard main crop variety. Remains in good condition for table use a very long period. See price list following.

COUNTRY GENTLEMAN OR SHOE PEG

Perhaps this is the most popular all around variety of sweet corn. There is none finer than this large eared, deep grained variety. Ears large, kernels very deep and set unevenly on the cob. Quality could not be better. It is a late variety but matures nicely for table use in this section. See price list following.

STOWELL'S EVERGREEN

This is a favorite standard main crop variety. Ears very large and handsome, with very deep even kernels. An exceptionally sweet, high quality corn. A late variety, but matures very nicely for table use in this section. Continues in fit condition for table over a very long period and generally lasts until after frost in the fall. See price list following.

Country Gentleman Sweet Corn

Pop Corn

WHITE RICE

The most popular widely known variety. Prices by mail: 1-2 lb. 15c, 1b. 25c, 2 lbs. 40c, postage paid.

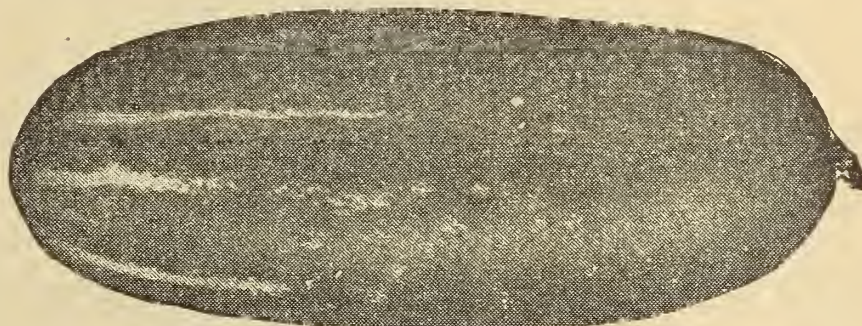

Cucumbers

JAPANESE CLIMBING

While all cucumbers are running vines, this variety is more creeping or climbing in its habits and will run well on trellises. Fruit 12 to 16 inches long dark green and smooth. Flesh pure white, crisp and tender, and of very fine quality. Prices following.

GREEN PROLIFIC

A favorite with pickle growers and commercial gardeners. Fine for table use. This is an early variety. Prices following.

Davis Perfect Cucumber

ARLINGTON WHITE SPINE

An improved white spine of exceedingly fine quality, especially fine for slicing and equally good for pickles. Grows quite large. We strongly recommend this variety. Prices following.

EARLY GREEN CLUSTER

A very early variety, medium length, produces bulk of crop near the root in clusters. A good pickling variety. Prices following.

CHICAGO OR WESTERFIELD PICKLING

A variety grown extensively for large pickling establishments. Good for home use and for market gardeners. Prices following.

IMPROVED LONG GREEN

An old time favorite. Fruit long and slim. Exceedingly fine quality. Good for both pickling and slicing. Prices following.

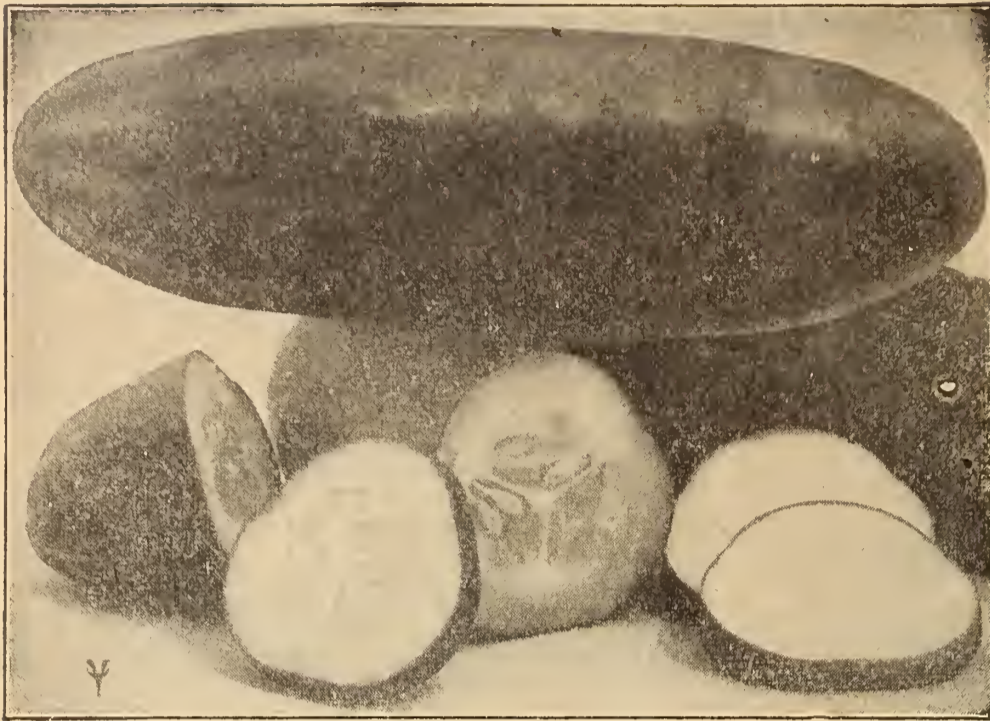

DAVIS PERFECT

In color a dark glossy green, with white veins. A very handsome high quality cucumber. Particularly fine for a slicing variety. Prices following.

Cress

CURLED OR PEPPER GRASS

This small salad is much used with lettuce, to the flavor of which it adds a warm pungent taste. Makes a most agreeable addition to any garden. Pkt. 5c oz. 10c.

Egg Plant

Sow seed early in spring in house or hot bed. Transplant same as tomato or cabbage when danger of frost is past.

NEW YORK PURPLE

Very large and smooth. Fine dark color. Pkt. 5c, oz. 20c.

Improved Hanson Head Lettuce

Endive

Fine for greens. Used same as lettuce, but has a higher flavor. Favorite greens with the Germans.

GREEN CURLED

Beautifully curled, tender and crisp. Pkt. 5c, oz. 15c.

WHITE CURLED

Very tender when cut young. Blanches readily. Pkt. 5c, oz. 15c.

Kohl-Rabi

Grow just as you would turnip or rutabaga. Very fine flavor when cooked and sliced.

WHITE VIENNA

The finest for market. Flesh white and tender. Pkt. 5c, oz. 20c.

Grand Rapids Lettuce

of catalog.

Lettuce

Lettuce is so commonly grown by all that instructions for growing are unnecessary.

PARIS WHITE COS

A very distinct variety of lettuce having large elongated compact heads that blanch mild and crisp. A very fine flavor. See price list.

EARLY CURLED SIMPSON

A very early variety. Forms a close compact mass of curly yellowish green leaves. Tender and crisp. A great favorite for years. See price list.

BLACK SEED SIMPSON

We have a very fine strain of this variety. Carefully selected. This is a very popular loose leaved sort. A favorite with market gardeners. See price list.

GRAND RAPIDS

An exceedingly fine early lettuce and a great favorite with market gardeners for forcing. This does not form heads but makes large compact bunches of light leaves with fringed edges. Delicious quality and handsome appearance. We strongly recommend Grand Rapids. See price list.

PRIZE HEAD

A large loose headed thin leaved sort. The very large leaves are crimped, bright green in color, edged with reddish brown, crisp and sweet. See price list.

IMPROVED HANSON HEAD

The Hanson is one of the most valuable of the crisp head sorts. Heads attain a very large size and are very firm. A great favorite. See price list.

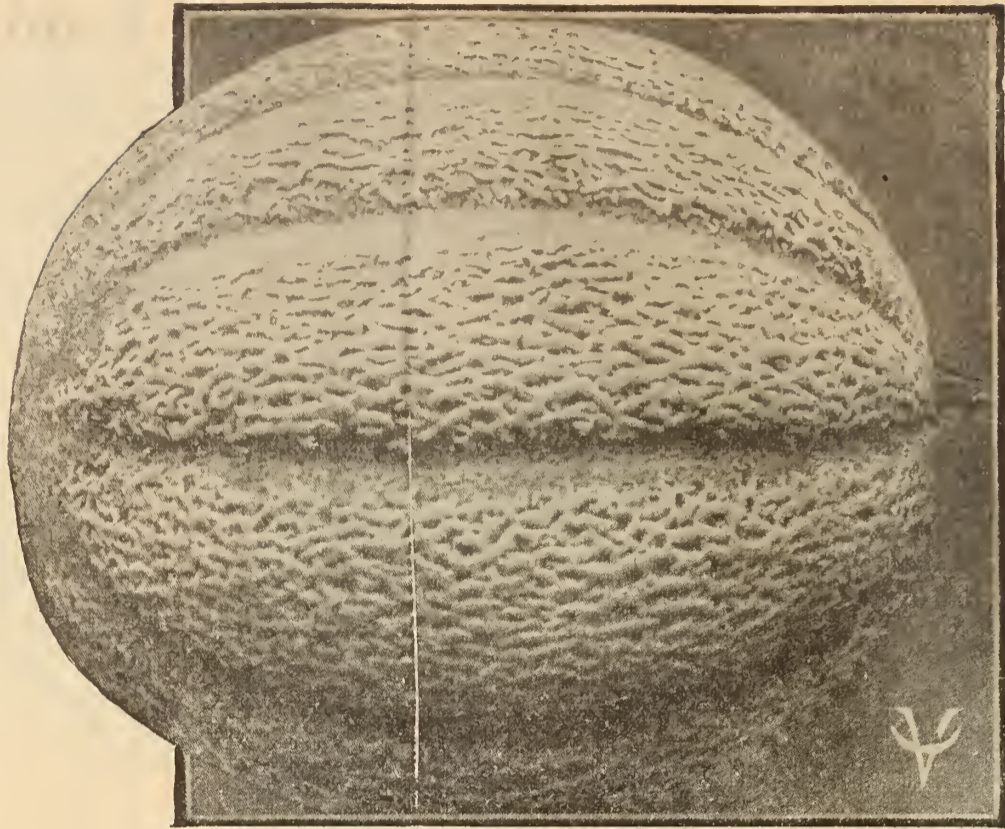

CALIFORNIA CREAM BUTTER

Forms round crisp solid heads of buttery flavor, medium early. One of the finest sorts of head lettuce. Very crisp and tender. If you want a fine lettuce try California Cream Butter.

Rocky Ford Cantaloupe

Musk Melon

OSAGE OR MILLER'S CREAM

Of medium size, oval form, dark green in color, somewhat netted and slightly ribbed. Flesh extremely thick, of firm texture, rich salmon in color. Highly flavored and delicious to the rind. Seed cavity very small. A remarkable keeper and a good shipping melon. Particularly good for Southern Idaho. See price list.

PAUL ROSE OR POTESKY

The fruits are nearly round or slightly oval, rather larger than Rocky Ford ribbed and heavily netted, of a light green or faint golden color, when ripe. The flesh is thick, of orange color, and ripens close down to the rind, with small seed cavity. The quality is unequalled, none finer. It is an excellent shipping variety of handsome appearance. See price list.

EDEN GEM—RUST RESISTING

This fine new melon is similar to Rocky Ford in size, shape and color of flesh, but is hardier and does not appear to rust. It is early and possesses the same spicy flavor as Rocky Ford. An excellent variety for market. See price list.

EARLY NETTED GEM

One of the earliest strains known. Resembles Rocky Ford and Eden Gem in quality, size, appearance and habit of growth. Green flesh of exceptionally fine quality. See price list.

Don't fail to read Parcel Post Instructions in front part of catalog before making out your order. It will save both you and ourselves time and confusion.

ROCKY FORD CANTALOUPE

This is one of the most popular of small crate melons and is grown extensively in Colorado and Arizona as a shipping melon. Vines vigorous and productive. Flesh green, sweet and delicious. A great favorite with our trade. See price list.

BANANA MUSK MELON

Yellow fleshed. Grows 15 to 20 inches long, 4 to 6 inches in diameter. The thick salmon-colored flesh has a delicious flavor and gives out an aroma like a banana. Many are extremely fond of this large melon. See price list.

EMERALD GEM

A very early, yellow fleshed melon. Acknowledged the most delicious in flavor. It is the earliest musk melon to ripen. Vines of strong, vigorous growth and very prolific. Fruit slightly flattened at ends, heavily ribbed. We recommend Emerald Gem for this section. See price list.

OSAGE GEM

A real netted Gem with salmon colored, delicious flesh. The skin is heavily netted like the Rocky Ford, which it resembles in appearance and many prefer it to the Rocky Ford on account of its salmon colored flesh and delicious flavor. Osage Gem has become the most renowned melon on the market. A remarkably fine cantaloupe both for home use and market purposes. It is a winner; by all means try Osage Gem. See price list.

BURREL'S GEM CANTALOUPE

The new Rocky Ford melon with golden meat. One of the finest flavored melons in existence. Size medium, shape oblong, rather sharply pointed at the ends. The skin is a rich dark green contrasting finely with the deep salmon-colored flesh. Ripens close to the skin, leaving only a thin rind. See price list.

CASABA

This variety is known as a winter melon on account of its long keeping qualities, said to keep until February. Do not pick until the light

streaks become yellow, then store away so they do not touch each other in a cool dark place. Flesh thick, juicy and delicious. Has a decided flavor of pineapple. Try this novelty. See price list.

EXTRA EARLY HACKENSACK

A very early melon. Fruit medium to large, nearly round evenly and deeply ribbed, with very close netting. Flesh green, juicy and sweet. See price list.

Preserving Melon

VINE PEACH OR MANGO MELON

An excellent fruit for preserving. Fruit about the size of a large peach and of a bright orange color. Pkt. 10c, oz. 15c.

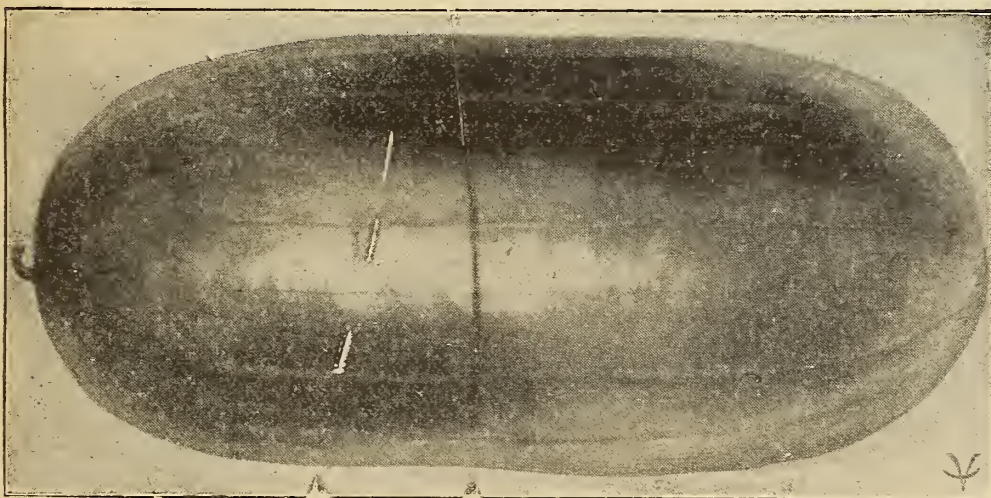

GARDEN LEMON

Very similar to Vine Peach. Fine for preserving and pickling. Pkt. 10c, oz. 15c.

Kleckley's Sweet Water Melon

You can get a fine Farm Book free of charge, with a \$10.00 order.

Water Melon

COLE'S EARLY

Very hardy, a sure cropper, flesh dark red and possesses all the desirable qualities. Medium sized, round, rind green, striped with light shades. A very early melon and a good one for this section. See price list.

PHINNEY'S EARLY

Few of the early sorts surpass this old favorite. It is first to ripen, of good size and productive. Oblong in shape, marked with two shades of green. Thin rind, the red flesh is very sweet. Melons mature early and vines bear abundantly. See price list.

SWEETHEART

This melon is nearly round in shape, but a little longer than thick. The skin is a bright mottled green. The flesh is red, firm, crisp and exceedingly sweet. Popular as a shipping melon in some sections. This melon does exceedingly well in this section and is very popular. We recommend Sweetheart. See price list.

KLECKLEY'S SWEET OR MONTE CHRISTO

A splendid sort. One of the sweetest of melons. Skin dark green, flesh bright red and very delicious. Valuable both as a market sort and as a home melon. A great favorite. Early and a heavy producer. See price list.

HALBERT HONEY

Equal to Kleckley's Sweet, which it closely resembles. About 20 inches long, almost equally round at each end. A handsome melon. Rind dark green, flesh very sweet. A big producer and a good home market melon, but not a shipper. See price list.

ALABAMA SWEET

The melons are large, of oblong form and have a firm, dark green and slightly striped rind. Flesh of delicious flavor. One of the very best melons. Try Alabama Sweet. See price list.

McIVER'S WONDERFUL SUGAR

Without a single exception the sweetest melon of all. It is of medium size, with striped or variegated skin. Flesh a beautiful red, light colored seeds. Oblong in shape, well adapted for home use and home markets, but not a shipper. We strongly recommend this fine melon. See price list.

Dwarf Green Okra

Mustard

Used extensively for greens and exceptionally fine for that purpose.

WHITE LONDON

Mostly grown for its large, round, yellow seed, which is used extensively in pickles and for seasoning; also for greens. Pkt. 5c, oz. 10c.

SOUTHERN GIANT CURLED

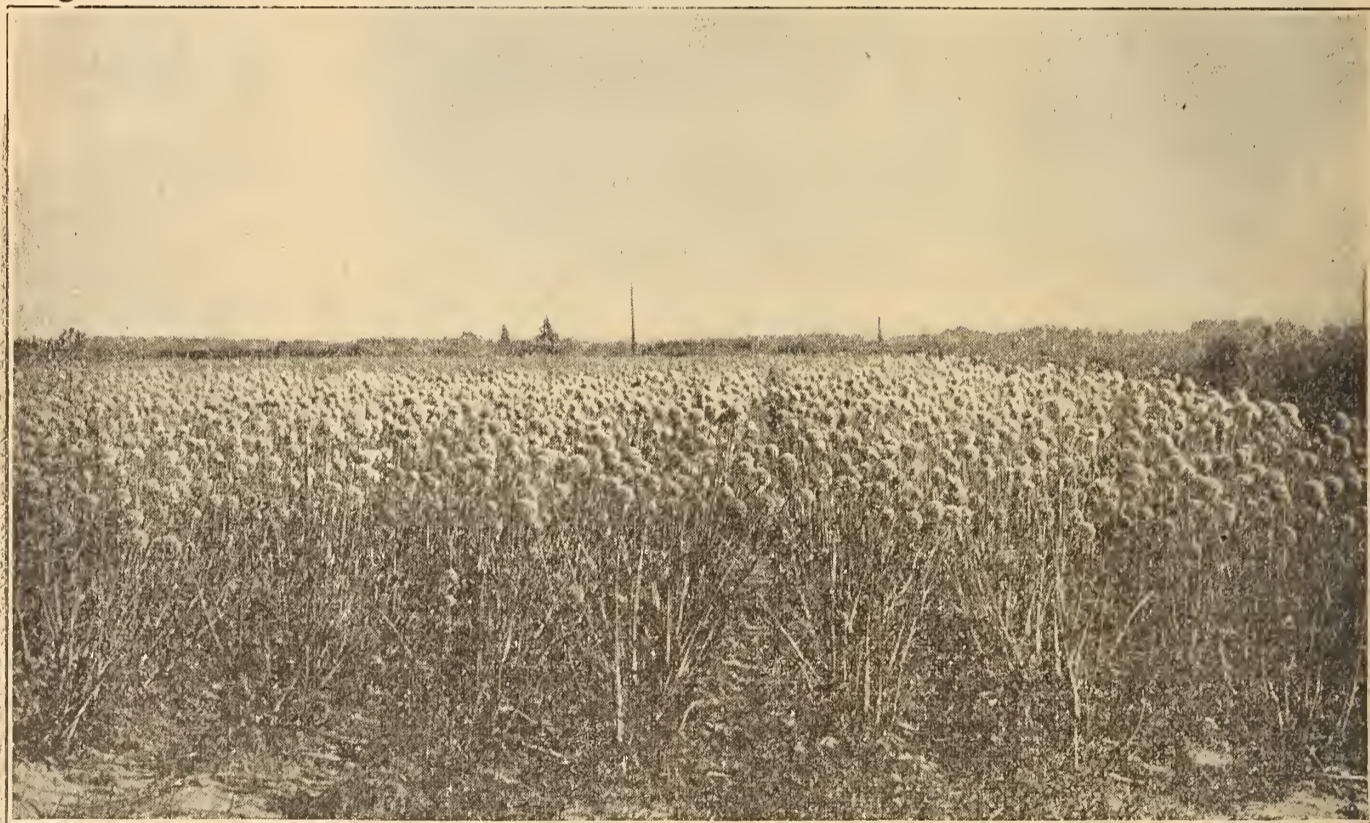

Produces large, dark green leaves with extra curled edges. Fine for salads and greens. Pkt. 5c, oz. 10c.

Okra or Gumbo

The young seed pods of this southern plant are used for the well known and delicious Gumbo soups, alone or with chicken. Does well in this section.

DWARF GREEN

The best variety of Okra for this section. Grows low and stocky, is very productive. Sow in open ground in May. Pkt. 5c, oz. 10c.

This is how we grow them. One of our fields of Select Onion Seed near Twin Falls.

Onions

IDAHO GROWN SEED

If you are an onion grower and want the finest of acclimated seed you should get our onion seed without fail. We are offering the finest stock this year that we have ever had the pleasure of offering our trade. We grow our own onion seed (all the most important varieties). This seed is from the finest of selected bulbs, all fresh, high quality goods. Our seed is grown here at Twin Falls at an altitude of nearly 4,000 feet, if any seed in the world is hardy it is this stock. Our onion seed

should bring you as good results as any you could buy from any source.

A PROFITABLE CROP

Onions are a profitable crop to grow in this section when properly handled. Should be sown as early in spring as it is possible to work the ground. You will never get onions too early, as frost will not harm them while young. We have known onions to produce from 400 to 500 sacks (100 lb. sacks) per acre in this section, and at any fair price they cannot help but make you good money. It is not so expensive to grow onions as you may think when you handle them right, and they are a safe and sure crop, when once you get a good stand you have a crop of onions providing you take care of them. We

Prizetaker Onion

can and will be pleased to give you all the information you need for growing onions.

Our prices on our Select Onion Seed are right. Sow at least 4 lbs. per acre.

EARLY YELLOW FLAT DANVERS

Shape flat or more nearly so than the Globe Danvers. Very productive, medium sized, early, a very reliable sort. Pale yellow skin, small neck.

YELLOW GLOBE DANVERS

This fine onion is of large size. An early and abundant cropper. Bulbs are very thick, necks small. Handsome in appearance and a good dark yellow color. A good variety for this section and a good market onion. See price list.

MOUNTAIN DANVERS (YELLOW)

This great new onion is in a class by itself as a market variety all large onion growers should be interested in Mountain Danvers. It is one of the prettiest type onions ever introduced, the bulbs are nearly round, very seldom produces a scullion or big neck, it is extremely early in maturing and dries down hard and heavy, the heaviest onion for the size we have ever seen. In size it would not be called extremely large, but is always larger than medium, runs very few small specimens, the evenest running sort we know of. A good big yielder, as nearly all the onions on the field are of marketable size. As a keeper Mountain Danvers has no superior, being extremely hard and firm. It will carry longer than most any other variety. Our stock of this variety is exceptionally fine, you cannot find a better strain than our Mountain Danvers. It was grown by ourselves right here at Twin Falls from extra selected bulbs. See price list.

OREGON DANVERS (YELLOW)

This is the variety generally planted in the onion growing districts of the Northwest. The Oregon Danvers is a very heavy producer, a great keeper and on account of its fine appearance and keeping qualities commands a good price in most markets. The bulbs are uniform-

ly large, of a half globe in shape with very small necks. We recommend Oregon Danvers as a market sort.

PRIZETAKER

Grows to an immense size and for early marketing is unexcelled. Although of such great size it is a fair winter keeper. Ripens up firm, very fine grained, mild, delicate flavor. Color rich yellow. See price list.

BROWN AUSTRALIAN

This onion is of medium size, wonderfully hard and solid. Very attractive for market purposes, both as to form and appearance. Australian Brown is the best keeping onion known. The color of the skin is amber brown. A great market sort and a fine onion for this locality. We strongly recommend Australian Brown. See price list.

SOUTHPORT RED GLOBE

The deep dark red color of our Southport Red Globe is one of its superior points. Very large and uniform in size and appearance. Wonderfully hard and firm, a great late keeper. One of the handsomest onions in cultivation and a great market onion on account of its appearance and keeping qualities. See price list.

LARGE RED WEATHERSFIELD

We have a very fine strain of this favorite old standard variety. Color is deep purplish red, flesh white and very firm. Yields enormous crops and is one of the best winter keeping onions. A good market sort. See price list.

EXTRA EARLY WHITE BARLETTA

The very earliest onion in cultivation. One of the best for pickling, being naturally quite small. Pure white, mild and delicate; makes an extremely pretty bunch onion.

Impossible to quote this season. If interested write us.

SILVER SKIN OR WHITE PORTUGAL

A medium sized onion of very fine appearance. We have been struck with the way this onion seems to take to our soil and conditions. We have seen a great many beautiful specimens grown here and it appears to be very early and productive with us. A good keeper, delicate and mild flavor. See price list.

SOUTHPORT WHITE GLOBE

This onion grows to a very large size and is a perfect globe shaped sort. Color pure white, a good keeper and excellent market variety. A beautiful appearing onion. We recommend the Southport White Globe—give it a trial. See price list.

CRYSTAL WAX BERMUDA

One would not look for Idaho to be a Ber-

muda onion district, but this onion is proving to be well adapted to this section. The Bermuda has been well tried out here the past two seasons and results have been entirely satisfactory. The Crystal Wax proves to be very early in this section, maturing away ahead of most other varieties. These onions are the mildest flavored of all varieties. It would seem that the Bermuda must prove a money maker as an early market sort and they always command higher prices in the market than other sorts. Crystal White Wax grows to a good size, runs very uniform in both size and appearance, a handsome, clear crystal white in color. Starts to form bulbs almost as soon as it gets through the ground and very seldom shows a big neck or scullion. Do not confuse the Crystal Wax with the ordinary White Bermuda; it is a different onion and very much superior. See price list.

Onion Sets

Sets are very scarce. Get your orders in early. We have a fair sized stock to commence the season but do not know where more is to be obtained to sell at our present prices. Our quotations are good only while present stocks last.

Prices by mail, first and second zones:

Yellow Globe sets, lb. 25c, 5 lbs. \$1.20, 10 lbs. \$2.00.

Red Globe sets, lb. 25c, 5 lbs. \$1.25, 10 lbs. \$2.00.

White Globe sets, lb. 30c, 5 lbs. \$1.40, 10 lbs. \$2.50.

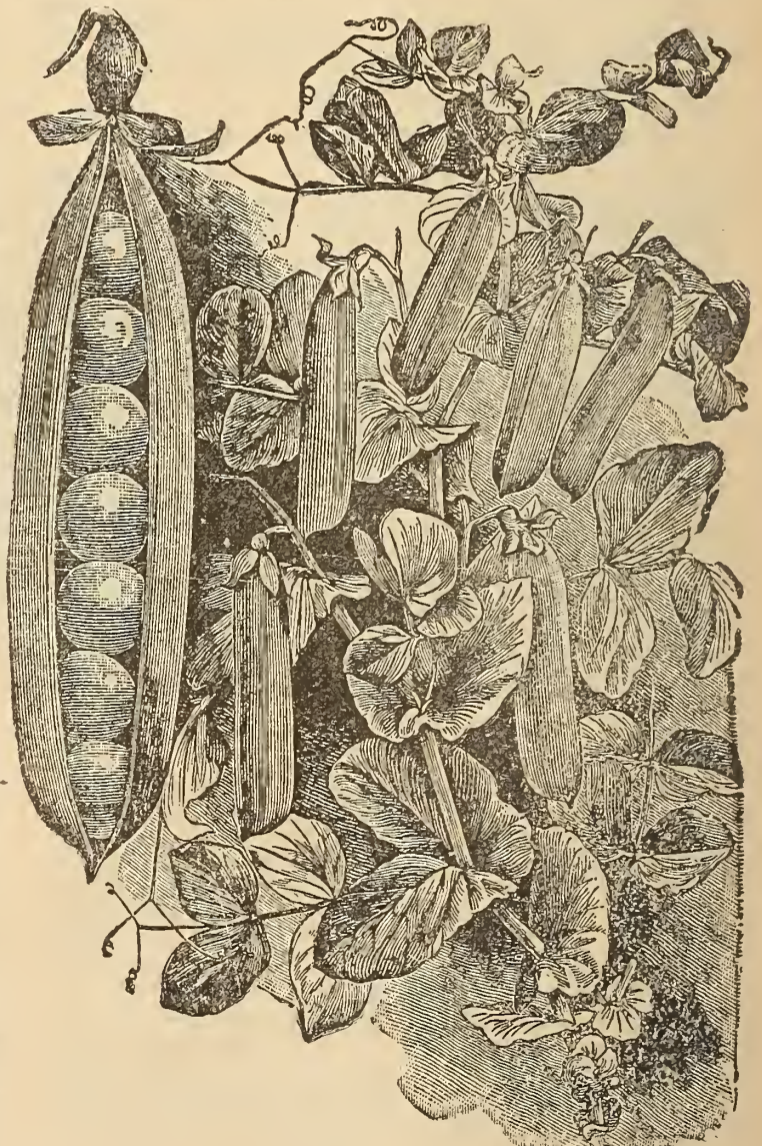

Postage paid in first and second zones. If you are located in third zone add 1c lb. and if in fourth zone add 2c lb. to above prices to cover extra postage. If you are within 150 miles in a straight line from Twin Falls you are in the second zone.

Peas

WE QUOTE PEAS BY THE POUND. OTHERS QUOTE THEM BY THE PINT AND QUART. BEAR IN MIND THAT A PINT DOES NOT WEIGH A POUND. WE ARE QUOTING PEAS CHEAPER THAN ANY OTHER HOUSE WE KNOW OF. WE GROW OUR OWN PEAS AND NO HOUSE CAN SERVE YOU BETTER.

EARLY ALASKA

Well known and extensively used as an extra early variety. Vine is strong and vigorous, 2 to 2 1-2 feet tall. Pods 2 1-2 to 3 inches long and well filled. Ready for picking about 50 days from planting. Peas round blue, slightly pitted. Quality good. Very productive. See price list.

Advancer Peas

Early Alaska Peas

AMERICAN WONDER

Vigorous and productive. Vines growing 9 to 12 inches tall. On account of its dwarf habit of growth it is a favorite for home garden use. Pods about 2 1-2 inches long and well filled. Fit for use about 55 days from planting. Peas wrinkled, green, medium sized and very sweet. American Wonder is a favorite early. See price list.

HORSFORD'S MARKET GARDENER

Strongly resembles Little Gem in habit of growth, but a little taller vines, grow 26 to 30 inches tall, foliage dark green, pods light green, about 2 1-2 inches long. A very heavy producer and a high quality fine flavored pea. A favorite with market gardeners. See price list.

McLEAN'S LITTLE GEM

Strong and vigorous grower, producing vines from 18 to 24 inches tall, dark foliage. Pods about 2 1-2 to 3 inches long, light in color and blunt at the ends. Ready to pick about 60 days from planting. Peas green, wrinkled, of medium size and very sweet. An old favorite early sort that deserves its popularity. See price list.

GRADUS

A large, wrinkled, early pea with pods nearly as large as Telephone, well filled with large peas of excellent quality and flavor. Gradus is very early and for quality there is nothing superior. Vines grow 28 to 30 inches tall. Pods 4 to 4 1-2 inches long. An exceptionally fine pea. See price list.

CARTER'S DAISY OR DWARF TELEPHONE

Vines 18 to 20 inches high with rather coarse foliage, medium light green in color. Pods about 4 inches long and well filled with large, delicious, wrinkled peas. Ready for picking about 65 days from planting. See price list.

CARTER'S TELEPHONE

Vines and leaves large and coarse Foliage light green in color A tall grower, but we have no difficulty in keeping them upright. Pods about 4 1-2 inches long and well filled with the sweetest and best peas imaginable. Fit for picking about 65 days from planting; a good yielder. If you want quality in peas plant Carter's Telephone; there is nothing finer. See price list.

ADVANCER

Vines upright and vigorous in growth, hardy and productive. Height about 30 inches, foliage dark green. Pods about 2 1-2 to 3 inches long. Ready for picking about 60 days from planting. Peas green, wrinkled, medium sized and very sweet. A high quality variety that will give you satisfaction. A wonderful yielder. We recommend Advancer. See price list.

Parsley**MOSS CURLED**

A very fine curled variety. One of the handsomest for garnishing purposes. The exceedingly curled leaves make it desirable. Pkt. 5c, oz. 10c.

Parsnips

Sow as early in spring as ground can be worked, in drills about 18 inches apart. Do not cover deep. Hoe and cultivate often. Can be left in ground all winter, which improves the flavor, but do not allow them to stand over and go to seed, as they are apt to run wild and become a weed.

HOLLOW CROWN SUGAR

This is the most popular and perhaps the best all around variety of parsnip. Roots long, white, smooth and tender, of excellent flavor.

Pkt. 10c, oz. 20c, 1-4 lb. 60c, 1 lb. \$1.50.

Moss Curled Parsley

Peppers

Ruby King Pepper

Sow in hot bed in March and when soil has become warm transplant in rows 2 feet apart and about 18 inches apart in row. Cultivate well. Peppers do very nicely in this section.

LARGE BELL OR BULL NOSE

A very large sort of inverted bell shape. Suitable for filling or for mixed pickles. Flesh thick, hard and less pungent than most sorts. Pkt. 10c, oz. 65c.

RUBY KING

An improved sort reaching a very large size, yet retaining the symmetrical shape of the smaller sorts. An old favorite. Pkt. 10c, oz. 65c.

CHINESE GIANT

Without a doubt one of the very best and largest Mango Peppers ever introduced. Its mammoth size, splendid shape and mild flavor commend it very highly. Pkt. 10c, 1-4 oz. 20c, oz. 65c, 1-4 lb. \$2.25.

RED CHILI

Used in the manufacture of pepper sauce and in salads. Pkt. 5c, oz. 65c.

If you are beyond second zone add postage on Beans, Peas and Sweet Corn at rates shown under Parcel Post Instructions in front of catalog.

Pumpkin

SMALL SUGAR PIE

A rather small but handsome variety. Shape round, skin deep orange color, flesh fine grained and sweet. See price list.

CONNECTICUT FIELD

The hardiest of all pumpkins. Cultivated mainly for stock feeding. Produces enormous crops. See price list.

BIG TOM

One of the best varieties for field purposes. Particularly desirable for stock feeding. Grows to very large size. See price list.

KING OF MAMMOTHS

Grows to enormous size, the largest pumpkin in cultivation. It is always a winner at fairs and exhibitions. Exceptionally valuable for stock feeding. See price list.

JAPANESE PIE PUMPKIN

Of medium size, good keeper. Weight 15 to 20 lbs. each. The flesh is a rich salmon color, unusually fine grained, cooks very dry and mealy like a sweet potato. As a pie pumpkin Japanese Pie has no equal. See price list.

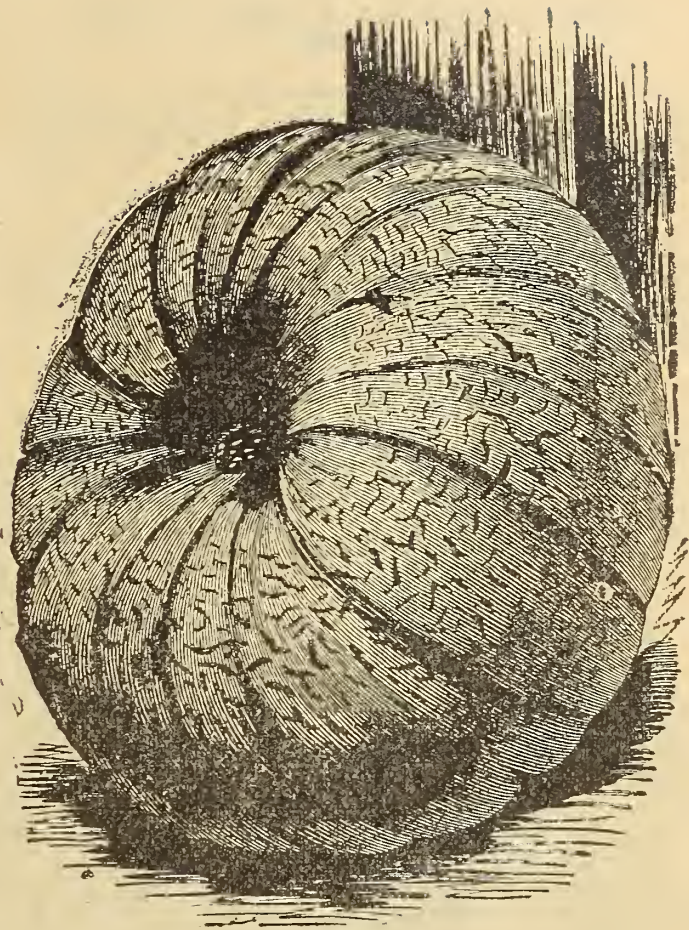

TENNESSEE SWEET POTATO PUMPKIN

Hardy, productive, sweet and delicious. One of the best for cooking purposes ever introduced. Fine for pies. See price list.

Rhubarb

A very good way to get rhubarb is to sow the seed in very rich soil and transplant the roots the following autumn to trenches well filled with good soil mixed with well rotted manure.

VICTORIA OR MAMMOTH

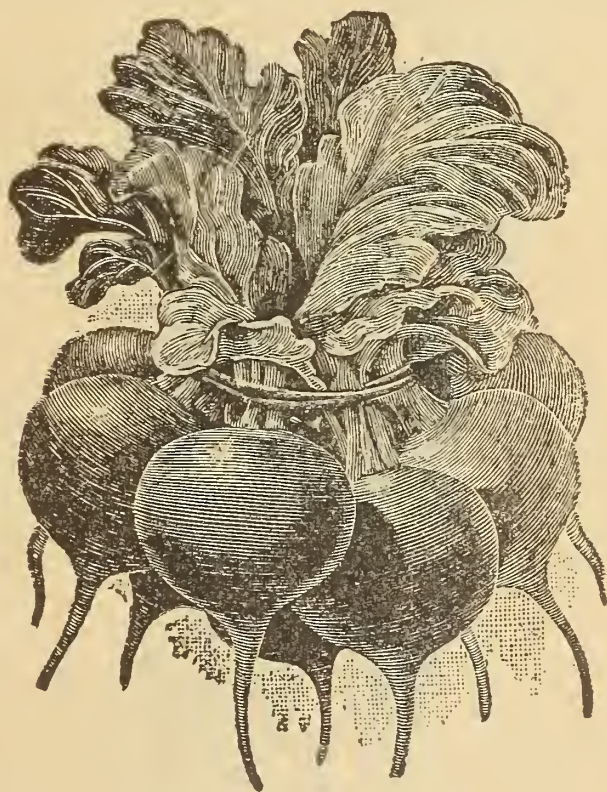

Very large fine cooking variety. Stalks a beautiful red. Gives satisfaction everywhere. Pkt. 5c, oz. 15c.

EARLY LINNEAUS

A large early variety, very tender and of fine flavor. Bright red stalks. Pkt. 5c, oz. 15c.

Radish

Scarlet Turnip Radish

EARLY SCARLET TURNIP

The standard early turnip radish, small round, bright red, of very quick growth, crisp and tender. Scarlet Turnip is a very popular radish. See price list.

EARLY SCARLET TURNIP WHITE TIPPED

A beautiful variety. Deep scarlet with white tip. Very early. Has a small top and may be planted closely. Flesh crisp, tender and sweet. See price list.

FRENCH BREAKFAST

Medium sized and very early. Shape oval or half long. Color bright red with white tip; crisp and tender. A beautiful radish and a favorite early sort. See price list.

CRIMSON GIANT

A new early radish, double the size of any of the turnip shaped types. DOES NOT GET HOLLOW OR PITHY. The flesh is white, solid, crisp and juicy and of the mildest flavor. Shape varies from round to almost oval. We strongly recommend Crimson Giant. See price list.

CINCINNATI MARKET—LONG RED

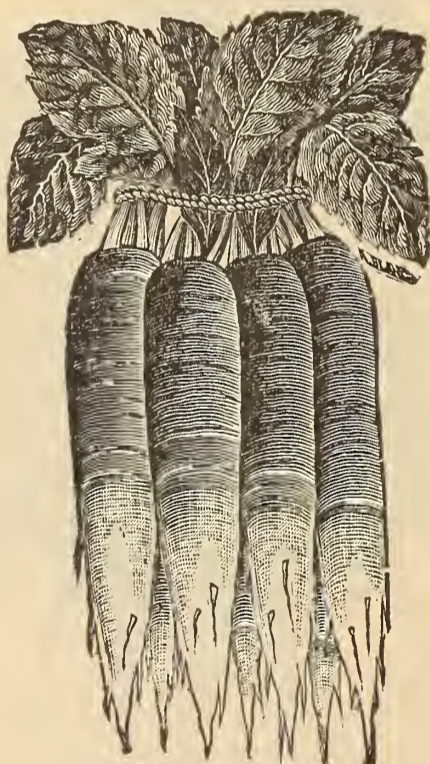

The tops of this radish are very small. The brightest and handsomest long scarlet radish grown. Fit for use in 25 days from sowing and remain in good condition until full grown. See price list.

WHITE ICICLE

A beautiful, transparent white variety. About three inches long, with small tops. Crisp and brittle and remains in good condition a long time. Does not get pithy. See price list.

WHITE STRASBURG

A large showy summer variety. Grows to immense size. It covers a long season, as it is good when quite small. The roots are half long, white, very crisp and tender. Grows very rapidly, sometimes producing a crop in six weeks. See price list.

Cincinnati Market Radish

WHITE STUTTGART

A very large, white summer sort. Grows to immense size, resembling a small White Egg Turnip. White flesh, very crisp and tender, a splendid radish. See price list.

CHINESE ROSE WINTER

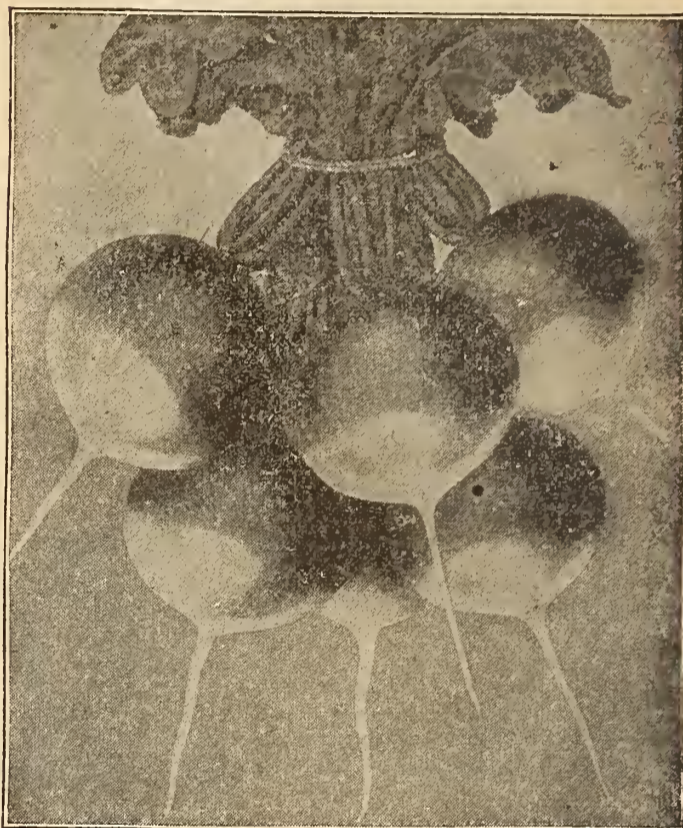

Bright rose color. Shape cylindrical or largest at bottom. One of the very best for winter use. Flesh firm, crisp and tender. See price list.

CALIFORNIA MAMMOTH WHITE

First introduced into this country by the Chinese in California. It is pure white about one foot long, and two or three inches through, tapering regularly to the tip. The flesh is tender and crisp, keeping well through the winter. See price list.

ROUND BLACK SPANISH

Roots round, sometimes top shaped, three to four inches in diameter. Skin black, flesh white. Fine for winter use as roots keep a long time. See price list.

Under FARM and POULTRY BOOKS in back of Catalog. You can get a fine Farm or Poultry Book free of charge, with a \$10.00 order.

Salsify or Oyster Plant

Cultivate same as carrots or parsnips. A part of the crop can be left in the ground until spring when it will be found fresh and plump. A delicious vegetable.

MAMMOTH SANDWICH ISLAND

This is the best all around variety of salsify. Pkt. 5c, oz. 25c, 1-4 lb. 75c.

Spinach

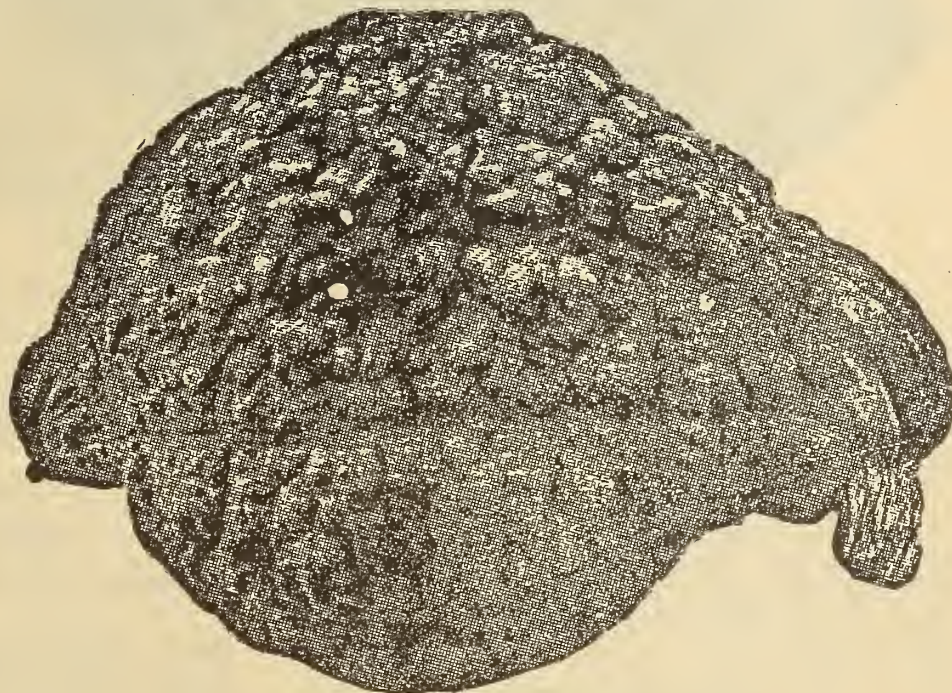

ROUND LEAF SUMMER

This variety is generally preferred in the north for early spring sowing and is most popular with market gardeners. Pkt. 5c, oz. 15c, 1-4 lb. 40c, 1 lb. \$1.25.

BLOOMSDALE

Large curled and wrinkled leaves, tender and of the finest flavor. Pkt. 5c, oz. 15c, 1-4 lb. 40c, 1 lb. \$1.25.

We test all our

Warty Hubbard Squash

Squash

Mammoth Chili Squash

EARLY WHITE BUSH

Is earlier than any other variety. Of dwarf habit and very productive. Color white, shape scalloped. See price list.

GOLDEN CUSTARD (SUMMER)

A very early, flat scalloped sort of large size. Color yellow, flesh yellow and well flavored. See price list.

SUMMER CROOK NECK

Early and prolific. The fruits are true crook-neck type, heavily warted and of a light golden orange color. Very fine quality. See price list.

GOLDEN HUBBARD

A very distinct sort of the same shape and general character of the Hubbard Select, but matures earlier. Rich red and orange color, flesh deep orange, dry and of excellent quality. See price list.

WARTY HUBBARD

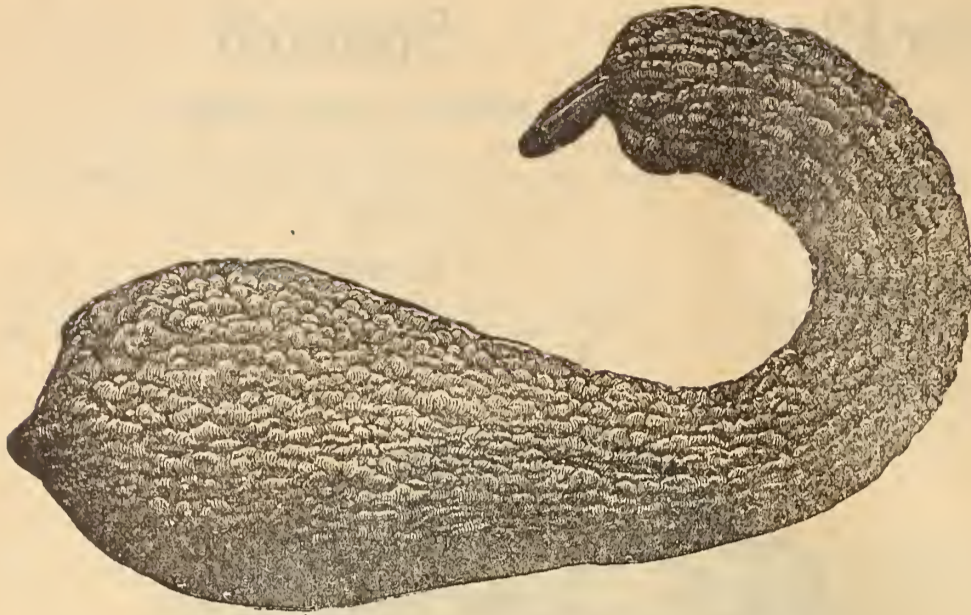

This variety of the Hubbard is a great favorite with marketmen. It is very striking in appearance and has been selected for years from exceptionally large and perfect specimens. It is very productive. Grows to nearly double the size of the common Hubbard. Dark green in color, skin very heavily warted. The best of all in flavor, a great market variety and a great keeper. See price list.

GREGORY'S DELICIOUS

All agree that Delicious is the finest flavored of all squashes. Grows to weigh 5 to 10 lbs. and is in its prime from early fall to mid-winter. Color a green shade with some blue specimens. In thickness of flesh it surpasses nearly every other variety. Cooks very dry and mealy, equal in quality to any sweet potato. By all means try Gregory's Delicious. See price list.

BOSTON MARROW

This is a standard fall variety of a rich orange color and very productive. It is a standard squash for pies and canning purposes. An old favorite of proven merit. See price list.

Summer Crookneck Squash

If interested
send for samples
of our Fancy
Seed Grains.
We want you to
see the kind of
stock we are
offering.

STOCK SQUASHES

These squashes are very profitable for stock feeding. Better yielders and better in feeding value than pumpkins. The wonder is that more squash is not raised for stock feeding. They are very easily grown and the yield is enormous. Try squash for stock feeding; fine for hogs.

MAMMOTH CHILE

Attains an enormous size often reaching a weight of 200 pounds and has been known to reach 300 pounds in weight. Despite its size the flesh is rich and fine flavored. It is particularly valuable for stock feeding and for exhibition purposes. An enormous yielder. See price list.

MAMMOTH WHALE

THE HEAVYWEIGHT OF THE SQUASH FAMILY. It is quite common for specimens to make a weight of 300 pounds. Outer color a rich orange. Flesh very thick and of a rich yellow color. Quality good. Very valuable for stock feeding and a good one to raise for exhibition purposes. Try a patch of Mammoth Whale if you want something out of the ordinary. Pkt. 5c, oz. 10c, 1-4 lb. 50c, lb. \$1.50.

ENGLISH VEGETABLE MARROW

Flesh rich salmon yellow, dry and fine grained. Excellent as a pie squash and for table use generally. A great many people prefer English Vegetable Marrow to any of the squash family. See price list.

Tomato

JOHN BAER

THE EARLIEST AND BEST TOMATO ON EARTH

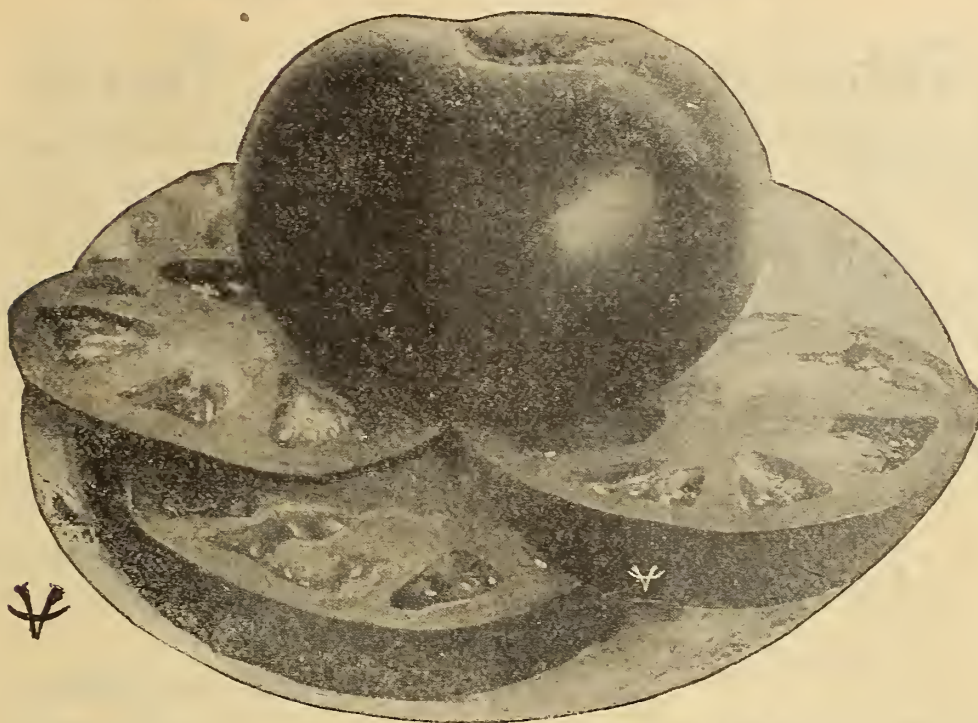

For several years we have been trying to find a tomato that is earlier than Earliana and at last have found it in John Baer. This grand new tomato is a full week earlier than Earliana, which has been sold under its own and other names as the earliest for years. One of the chief complaints on Earliana has been its tendency to produce rough and uneven fruit. The John Baer produces the smoothest, most beautiful fruit imaginable and for quality is unequaled. We look to see John Baer take the lead of everything as an early garden and market sort. See price list.

ACME

An early purple fruited tomato, very valuable for market gardeners who ship or have a home market; also for home garden use. The vine is large and very prolific, bearing fruit in clusters of four or five. Ripens early and the fine, smooth, large tomatoes are produced until frost comes. One of the A1 varieties—a splendid sort. See price list.

Dwarf Stone Tomato

Acme Tomato

EARLIANA

The earliest of all tomatoes, without a doubt. Large in size and beautiful in color. Nearly seedless and very solid, a vigorous grower and heavy yielder. Not as smooth as Chalk's Jewell but earlier. A great favorite in this locality. See price list.

CHINE'S JUNE PINK

One of the earliest varieties and a favorite with those who like the pink color. The originator of June Pink claims that it ripens as early as Earliana. The fruit is deep pink and very handsome. Fruit is good sized and hangs in clusters. A great yielder. See price list.

DWARF CHAMPION

Dwarf, compact and upright in habit of growth, with very thick short jointed stems, requires no stakes. Color deep red with a purplish tinge. Fruit round very smooth and beautiful. A very fine quality and flavor. We regard Dwarf Champion one of the very best tomatoes for this section. It is very hardy and will withstand frost better than any other variety we know of. See price list.

CHALK'S EARLY JEWELL

A fine second early tomato, about ten days later than Earliana, but a higher quality tomato than that popular variety. Fruit large, smooth and of very fine flavor. Color deep scarlet red. One of the best sorts known, both for home use and for market. See price list.

BEAUTY (LIVINGSTON'S)

One of the smoothest skinned and best of the large sorts. Vines large, productive and vigorous. Skin purplish pink, flesh pink and of excellent quality. A beautiful appearing tomato. See price list.

NEW STONE

A splendid main crop variety, large, smooth, meaty and solid. Color, fine scarlet. Core very small. A great favorite with canners. See price list.

PONDEROSA

A purplish pink tomato of enormous size. Medium early, a good bearer and of good flavor. Ponderosa has many admirers and if one wants a very large tomato this variety is unequalled. See price list.

GOLDEN QUEEN

Fruit large and smooth, color a beautiful golden yellow, sometimes with a slight blush of red as smooth and well shaped as the best of the red varieties and of superior flavor. See price list.

YELLOW PEAR

A small yellow pear-shaped variety used for preserving. Pkt. 10c, oz. 35c.

HUSK TOMATO OR GROUND CHERRY

Fruit golden yellow, size of a cherry. Fine for pies or preserves. Easy to grow—simply sow them and let them grow. See price list. TOMATO PLANTS IN SEASON. WRITE FOR PRICES.

Dwarf Champion Tomato

Tobacco

Culture—Plant in hot beds or in open ground in early spring and protect young plants carefully against frost, as they are very tender. Transplant about June 10th to rows about 30 inches apart and place plants about 40 inches apart in rows. Cultivate well and do not let plants blossom, but cut seed heads off soon as they appear. Cut plants off close to ground before frost and hang up in well ventilated place to cure. Tobacco can be grown in Idaho and many of our orchardists are interested, as it can be used to advantage as an insecticide.

CONNECTICUT SEED LEAF

This is by all odds the best variety of tobacco for our climate and conditions. Very broad leaves. Pkt. 10c, oz. 25c.

Herbs

A very small place in the garden will give you all the herbs needed in the family.

Rutabaga or Swedish Turnip

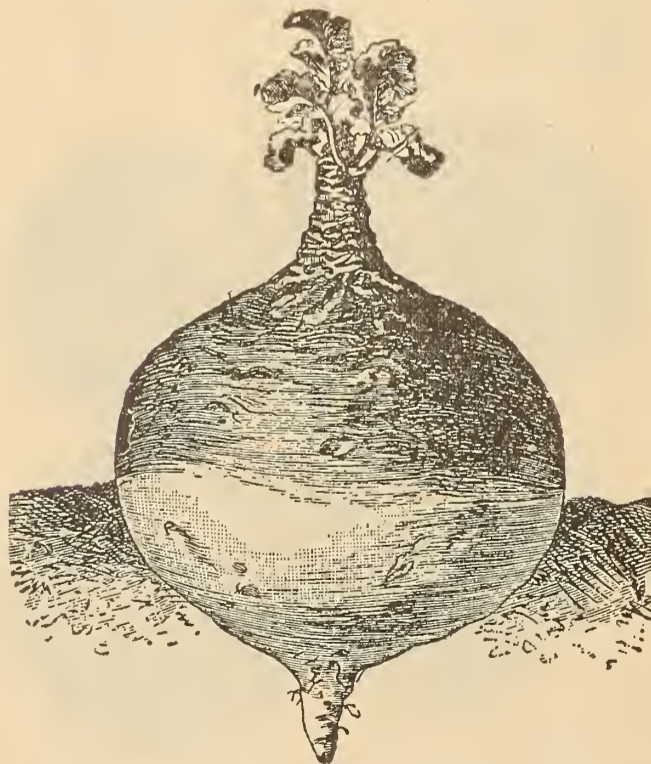

These fine large sweet turnips or rutabagas are much preferred over the ordinary turnips for table use by a great many people.

YELLOW PERFECTION

A new turnip of great merit. One of the best for a general crop. It produces a globe-shaped root, with smooth skin and light yellow flesh, which is firm and sweet. See turnip price list.

IMPROVED AMERICAN

This is a fine large purple-topped variety. Flesh yellow and very sweet, one of the very best sorts for table use also for stock feeding. See turnip price list.

Improved American Purple Top Rutabaga

Turnip

EARLY SNOWBALL

A perfectly globe-shaped white skinned turnip. Exceedingly productive. The flesh is fine grained, firm and of very delicate flavor. See price list.

EARLY WHITE FLAT DUTCH

An exceedingly early white variety. One of the best for spring sowing. Shape flat, flesh white, firm and sweet. See price list.

PURPLE TOP STRAP LEAVED

Rapid grower and of mild flavor. Good for both table use and stock raising. A large variety and an old favorite. See price list.

EARLY WHITE EGG

A favorite early turnip with our trade. It is long in shape, skin very white. Flesh firm and sweet. See price list.

PURPLE TOP WHITE GLOBE

An early variety. Globe shaped, heavy cropper. A handsome looking bulb, grows quite large. Good for both table use and stock feeding. See price list.

In flower seeds we aim to handle the very choicest strains that we can obtain. We buy our stock from the most reputable growers in the business and are in position to offer our trade the very finest and choicest selections. We buy these choice flower seeds in bulk and put them up ourselves. We want your flower seed orders and you should have our high quality flower seeds.

ALYSSUM

Small white flowers, delicately fragrant. Free

flowering plants for beds, edging, etc. Useful for bouquets because of the delicate fragrance.

LITTLE GEM

Dwarf and compact with plants a mass of white bloom from spring until frost. Pkt. 5c, oz. 25c.

ANTIRRHINUM SNAPDRAGON

This fine old fashioned flower is again becoming very popular. It has been greatly improved

Antirrhinum or Snap Dragon

in recent years. As a bedding plant it blooms continuously until late in the fall. Grows two to three feet tall. The long spikes of brilliantly colored flowers are valuable for cutting. Sown in early spring, it blooms freely the first season and will live through our winters, coming on again the next season.

FINEST MIXED—Containing all the choicest varieties in all colors. Pkt. 10c.

Aquilega or Columbine

**AQUILEGIA
COLUMBINE**

Charming hardy plants, bearing in countless numbers through May and June, exquisite clear blue, white, rose, yellow, purple and striped blossoms. This is a hardy, perennial, blooming second year from seed. No garden should be without Columbine.

SPECIAL DOUBLE MIXED, the very finest, pkt. 10c.

**ANEMONE
WIND FLOWER**

Very pleasing, hardy perennial plants for borders and beds. Fine large flowers, few plants compare with them in beauty. Fine for bouquets. Flowers shaped like a single poppy, in all colors.

FINEST MIXED—All colors of the choicest sorts. Pkt. 10c.

**BALSAM
LADY SLIPPER**

Beautiful half-hardy annuals, from 1 1-2 to 2 feet in height. Sow seed early in spring and protect against frost.

All best varieties mixed, pkt. 5c.

**CENTAUREA
BACHELOR'S BUTTON**

A showy hardy annual succeeding well in any soil, and bearing a profusion of flowers in shades of pink, blue and purple.

All colors mixed, pkt. 5c.

CANDYTUFT

Showy, hardy annuals, very useful for edgings and masses, excellent for cutting, continuous bloom from July to October.

FINEST MIXED—Pkt. 5c.

DWARF WHITE, pkt. 10c.

CAMPANULA OR CANTERBURY BELL

Very ornamental perennials, growing about 2 feet high, producing large bell-shaped flowers in long spikes, which make a glorious display when planted in beds. Sow seed soon as ground becomes warm, bloom second year from sowing and will stand for years.

FANCY SPECIAL DOUBLE MIXED — Pkt. 10c.

Campanula or Canterbury Bell

ASTERS

This grand old flower has retained its well-merited popularity for years. In recent years the different varieties have been greatly improved until there are few flowers to compare with the ASTER in beauty and display. They are very easily grown and perfectly hardy. Sow seed in boxes or cold frames or in open ground early in spring and when plants are 2 to 3 inches tall transplant them to bed or rows as desired. Cultivate well.

COMMON ASTERS

We carry a special mixture of the common sorts of asters, including the single Chinese and a large assortment of others. Pkt. 5c.

We aim to carry nothing but the finest strains in flower seeds. Our fancy flower seeds will always give you a beautiful flower garden of the choicest varieties.

GIANT COMET ASTERS

No class of Asters is finer than the Comet strain. Flowers are of the finest type, full and double, large and fluffy. Flowers grow to immense size, often measuring over 5 inches in diameter, resembling Chrysanthemums in size and appearance. Plants grow to a height of 15 to 18 inches. Colors run white, rose, pink, lavender, and purple.

PRICE LIST—ASTERS

Giant Comet, snow white, pkt. 15c.
 Giant Comet, lavender, pkt. 15c.
 Giant Comet, deep blue, pkt. 15c.
 Giant Comet, flesh pink, pkt. 15c.
 Giant Comet, purple, pkt. 15c.
 Giant Comet, special mixed, including all of above, pkt. 15c.

Giant Comet Aster

CARNATION

MARGARET MIXED—These carnations have created a sensation, not only on account of their beautiful colors, but, unlike all others, they bloom in about four months from sowing the seed. Bloom until checked by frost.

All colors mixed, pkt. 10c.

CALIFORNIA POPPY

The state flower of California. A bright free-flowering plant of low spreading growth. The poppy like flowers in pure shades of yellow, orange, and crimson, are produced from early spring until frost. Sow the seeds where the plants are to remain. Finest mixed, pkt. 5c, oz. 20c.

CYPRESS VINE

A most beautiful and popular tender climber, with very delicate, fern-like foliage and numerous bright red and white star-shaped flowers. Pkt. 5c.

CALIOPSIS OR CEREOPSIS

One of the most showy of all annuals, the colors being so striking as seldom to be passed without a remark.

FINEST MIXED—Pkt. 10c.

Calliopsis

CALLIOPSIS RADIATA

A new strain of Calliopsis. Flowers large, reddish brown, turning at points to golden yellow, spotted and blotched. Very striking and beautiful. Pkt. 10c.

COSMOS

A very effective autumn flowering plant, with beautiful foliage, growing from 6 to 8 feet high, literally covered with very large, single, daisy-like flowers in shades of rose, purple, red and white. For cutting, one of the finest flowers known. Sow in open ground soon as danger of frost is past. Best fancy mixed, pkt. 5c, oz. 25c.

COXCOMB OR CELOSIA

Celosias are interesting and brilliant annuals, and when grown from select seed never fail to please the grower and attract attention.

BEST SELECTED MIXED—Pkt. 5c.

COREOPSIS

Beautiful blue lavender, white and yellow flowers on the order of the Bachelor's Button, but larger. Very hardy annual and deserving of a place in every flower garden. Best mixed, pkt. 5c.

COBEA—CATHEDRAL BELL

One of the handsomest and most rapid growing climbers. The flowers are bell-shaped and of a purplish-lilac color when full grown. It is a very prolific bloomer and vigorous in vines and flowers. Half hardy annual. Pkt. 10c.

DAHLIA

Sow the seed early in pots or boxes or under glass and transplant to strong deep, rich soil, and plants will bloom the first season. Few people know that Dahlias can be grown successfully from seed but it is no more trouble to produce them than most of the annual flowers. Very striking and entirely new varieties are sometimes produced from seed. Best Double mixed, pkt. 10c.

Cosmos

DIANTHUS—SWEET WILLIAM

A splendid old fashioned plant, producing its large heads of beautifully colored sweet scented flowers in great abundance. Our special Dianthus mixture is sure to please. Contains all of the very finest strains. The unique colorings and shades of the flowers make a wonderful display. Plant this by all means. This is a perennial, blooming second year from seed. Pkt. 25c.

Dianthus—Sweet William

Dianthus—Garden Pinks

DELPHINIUM—LARKSPUR

Sow seed in open ground very early in spring and thin plants later to stand 6 to 8 inches apart. Flowers remarkable for their great beauty, diversity of shades, and striking appearance. Desirable for mixed borders. Flowers grow on long spikes and run through various shades of blue, pink and white.

SELECTED DOUBLE MIXED—All the finest sorts. Pkt. 10c.

LARKSPUR**PERENNIAL VARIETIES**

These perennial varieties of Larkspur are one of the most beautiful and snowy flowers in existence. Grows 2 to 5 feet tall and the immense, glorious spikes of flowers can be seen for quite a distance. In borders or hedges they are very striking. If sown early many of them will bloom the first year. Colors range through all shades of lavender, pink, blue and purple. Pkt. 25c.

DOLCHOS—HYACINTH BEAN

A rapid growing annual climber. Foliage very dark green and vigorous. A splendid climber. Flowers freely in erect racimens, followed by ornamental seed pods. Colors, white, rose, and lavender. Best mixed, pkt. 10c, oz. 25c.

DIANTHUS—JAPANESE GARDEN PINKS

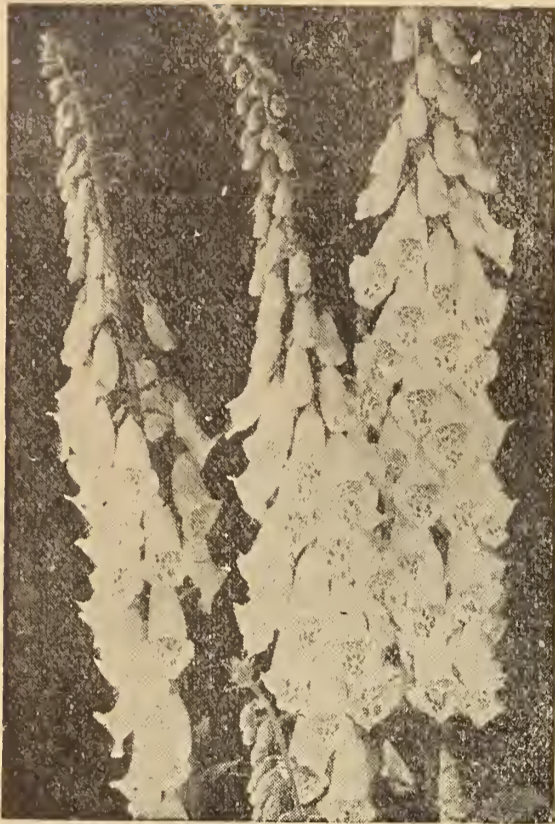

A popular annual variety known to nearly all. The flowers are distinguished for their brilliant contrasting variety of colors, appearing in each flower. Sow seed in open ground in early spring. Start blooming very early and continue until frost. Best special mixture all varieties. Pkt. 10c.

DOUBLE DAISY

Charming plants for edging and dwarf beds blooming first year from seed. Thrive well in shady places. Double mixed, pkt. 5c.

SHASTA DAISY

This is one of the creations of Mr. Luther Burbank. It is perfectly hardy, grows anywhere and blooms more abundantly each season. The flowers are very large, 3 to 4 inches in diameter when at their best, growing on long stems, with two rows of broad, pure white petals and a yellow center. This flower is a perennial and will stand from year to year after once sown. Pkt. 20c.

Digitalis Foxglove

DIGITALIS—FOXGLOVE

Handsome ornamental hardy plants of stately growth. The seed though small germinates readily. Once planted they continue to grow and bloom from year to year. The flower spikes are often 3 to 5 feet long and covered with bell-shaped flowers in many colors such as white, blue, yellow, pink, etc. Very striking and beautiful. By all means try this.

SPECIAL MIXTURE—All colors, the very finest. Pkt. 10c.

GERANIUM—GIANT FLOWERING HYBRIDS

A strain of seed saved from fine new improved Hybrids. The colors are all shades of scarlet, crimson, rose, pink, salmon, cream, veined pink blush, and pure snowy white. Few people know that Geraniums can be produced from seed the first season and produce blooming plants the first summer, but it is easily done. Sow the seed in open ground when danger of frost is past and thin plants to give plenty of room. Many new varieties can be developed from seed.

GIANT FLOWERING HYBRIDS, pkt. 20c.

GOURDS

These are desirable in many places where an immense amount of vine is wanted quickly. Most sorts are good for from 20 to 30 feet of vine in a season. The blooms of some are quite striking and handsome. With many sorts the fruit is quite ornamental. **BEST MIXED**, pkt. 5c.

HELIANTHUS—DOUBLE SUNFLOWER

These showy dwarf double sunflowers are very showy and attractive and worthy of a place in every garden. Produce immense ball-shaped yellow blooms.

BEST DOUBLE MIXED, pkt. 5c.

HELIOTROPE

Deliciously fragrant flowers of rich purple hue. The flowers and leaves have a mossy effect. Bloom from seed the first summer, if sown early in spring.

FINE MIXED, pkt. 10c.

Four O'clock

FOUR O'CLOCK

An old and well known favorite. Fine trumpet shaped flowers in many colors, making a fine summer hedge. Set 1 foot apart. Sow soon as danger of frost is past. Bloom first season from seed. **Mixed**, pkt. 5c.

KUDZU VINE OR JACK AND THE BEAN STALK

Flourishes where nothing else will grow. The large bold leaves of the brightest green afford a dense shade. Its greatest feature is its wonderful strong growth. Pkt. 10c.

Shasta Daisy

Hollyhocks

JAPANESE HOP

A splendid annual climber, rapidly covering arbors, walls, trellises, etc. The foliage resembles that of the common hop but is much more dense. Seed sown in the ground in early spring will produce large vigorous plants in a very short time. Withstands heat, drouth and insects. One of the most rapid growing and satisfactory climbers that we know of. Does particularly well in this section. Pkt. 5c, oz. 10c.

HOLLYHOCKS

Perennial plants of stately growth which will flower from seed the first year. The Hollyhock is a hardy perennial and continues to grow and bloom from year to year after once sown. By all means sow Hollyhocks; they are showy and attractive and easily grown.

BEST DOUBLE MIXED, pkt. 10c.

KOCHIA—BURNING BUSH

Summer Cypress or Burning Bush. Forms dense bushes of cypress-like appearance. During the summer they remain light green and in early fall they change to carmine and blood red. Pkt. 5c.

LINUM OR FLOWERING FLAX

CRIMSON FLAX, one of the handsomest of annuals ever introduced. Fine foliage, brilliant scarlet flowers, a mass of bloom all summer long. Pkt. 5c.

LOBELIA

These are charming little plants covered with numerous small blue blossoms all summer. They flower from seed the first year. Used extensively for borders.

BEDDING QUEEN—Dwarf. Flowers deep purple with white eye. Pkt. 10c.

LUPINS

TALL ANNUAL MIXED—Ornamental, free flowering, easily grown, with long, graceful spikes of rich and variously colored pea shaped flowers. Pkt. 10c.

MOON FLOWER

Beautiful rapid annual climbers. Foliage is very dense and in some kinds of remarkable shape. The flowers have a wide range of delicate coloring. The seeds about the size of a pea, should be notched with a file and soaked in warm water for 24 hours before planting to assist rapid germination. Pkt. 10c.

Marigold—Tall African

MARIGOLD

The Marigolds are old favorites, free flowering annuals of easy culture. Bloom all season and are very showy with their large yellow and orange blossoms.

TALL AFRICAN MIXED—Large double flowers. Pkt. 5c.

Japanese Hop

PETUNIAS

For outdoor decoration or house culture, few plants are equal to this class. They commence to bloom early and continue to flower through the entire summer and fall. Give them a rich soil and sunny place and they will make a wonderful display.

PETUNIA HYBRIDS, FINEST MIXED—Pkt. 10c.

PETUNIAS—RUFFLED AND FRINGED

We offer a special mixture including besides the Giant Ruffled all the colors of the large flowing and fringed sorts. We are sure no other Petunia mixture can produce flowers of a wider range of colors and markings. Pkt. 25c, 3 pkts. 65c. Try this mixture by all means.

Giant Pansies

PANSIES

Seed sown in the open ground in early spring will give fine blooms in late summer or autumn and a good crop of flowers the following season. Plant in a half shady place and keep well watered. The Pansy is one of the most popular of flowers and considering the east with which they can be grown they should be in every garden.

GOOD MIXED

This is a mixture of dozens of fine varieties and is far superior to the common mixtures generally offered. Pkt. 5c.

CASSIER TYPES MIXED

The Cassier types are blotched pansies, showing 3 or 5 large blotches to the bloom, generally on light background. Very striking and attractive. Pkt. 15c.

GIANT MIXTURE

Our Giant Mixture embraces all shades and a great many special strains of the largest and finest sorts known. There is no finer mixture of giant pansies offered by any one. For great size of blooms and beautiful types this mixtures cannot be surpassed. Giant Mixed, pkt. 20c, 3 pkts. 50c.

Hibiscus

HIBISCUS

These immense flowers often measure 7 inches in diameter and the plant will often have as many as fifty blooms at one time. Very showy and beautiful. They are perennial, blooming the second year from seed.

GOLDEN BOWL. Deep cream color with velvety maroon center. Pkt. 15c.

NASTURTIUM

No garden is complete without this attractive and popular annual. Its varied and brilliant colors, its refreshing odor make it desirable for table decoration. Blooms continuously until frost. Every one should plant nasturtium.

TALL MIXED—Best where climbing plants are desired. Dwarf mixed, for beds or borders. Pkt. 5c, oz. 15c.

NICOTINA

FLOWERING TOBACCO—Highly ornamental and desirable annual plants, with handsome and delightful sweet scented flowers. Requires plenty of room in the garden; elegant for massing, backgrounds, center of beds or in shrubbery. New Hybrid Mixed—Very fine. Pkt. 10c.

MIGNONETTE

No garden is complete without this fragrant plant. Very free flowering and easily raised. An old favorite.

MACHET SELECT—This is the finest of all sorts. Pkt. 10c.

MYOSOTIS—FORGET-ME-NOT

One of the daintiest and most delicate of all the garden favorites. Quite hardy. It succeeds best in rich moist soils. Excellent for borders and flowering extremely early. Especially effective when grown in masses.

INDIGO BLUE—An especially fine variety. Pkt. 10c.

ANNUAL PINKS

These flowers are without a superior among annual garden plants. Bloom continually all summer long, and are most beautiful and lasting as cut flowers. Of easy culture and bloom first year from seed. Very fragrant. Best mixed, pkt. 10c.

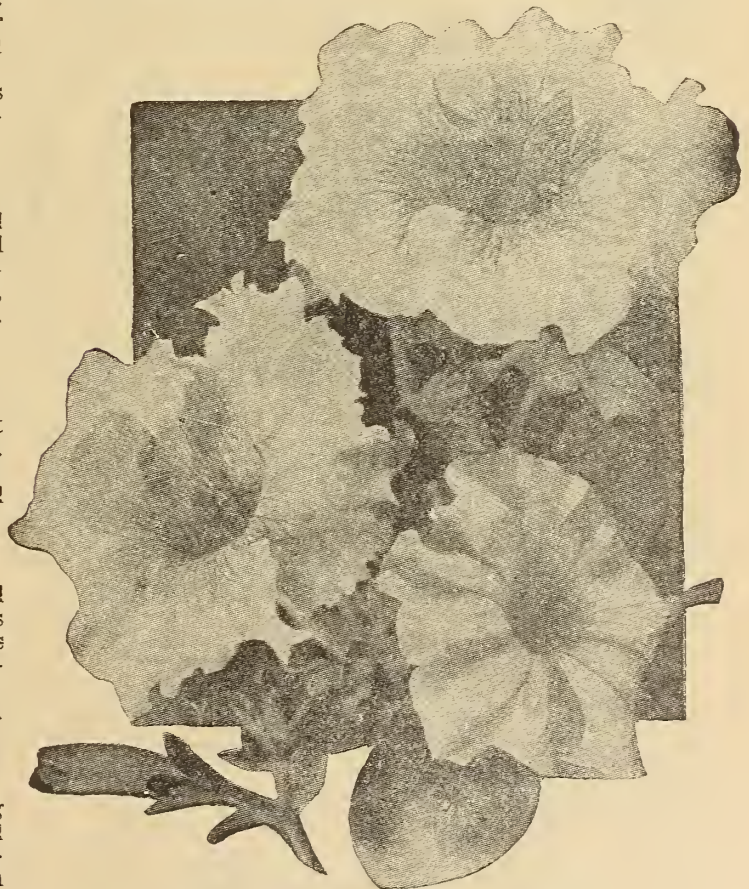

Morning Glory

MORNING GLORY

Climbing plants; unequalled for rapidity of growth and profusion of bloom; annuals attaining a height of 30 to 40 feet.

CLOVE PINKS OR GRASS PINKS

A very desirable sort of sweet scented annual Pinks. Very free early bloomers and great favorites on account of their very sweet odor. Many prefer the CLOVE PINKS to all other varieties. Our special mixture, pkt. 15c.

Ruffled Petunias—See preceding page

Perennial Phlox

PHLOX

Phlox Drummondii is one of the most brilliant of all annual flowers. Phlox continues to bloom long after most flowering plants are gone, making it a splendid bedding plant. It may be sown as early in spring as ground can be worked. Easily grown and always in bloom. No flower garden is complete without PHLOX DRUMMONDII.

FINEST MIXED—All colors. Pkt. 10c, 3 pkts. 25c.

PERENNIAL PHLOX

No garden is complete without this beautiful and showy perennial. Bloom second year from seed and continue to grow and bloom from year to year thereafter. The seed germinates very slowly, often requiring 5 to 6 months. Perennial Phlox comes in a countless number of brilliant colors and few flowers compare with it in brilliance. Very hardy. Start a bed of Phlox and it will be a pleasure for years to come.

FINEST PERENNIAL MIXED—All colors, Pkt. 10c.

STAR PHLOX

A decidedly unique variety. The flowers with their long pointed petals and broad white margins, having a beautiful starlike appearance. Many and wonderfully brilliant colors.

STAR OF QUEDLENBERG—The very finest mixture, pkt. 10c.

POPPIES

Showy, large, brilliant colored flowers, growing freely in any garden soil. Produce a fine effect in clumps or beds.

Best single mixed, all colors, pkt. 5c.

Best double mixed, all colors, pkt. 5c.

CALIFORNIA POPPIES

See description on another page.

Double Poppies

ORIENTAL POPPIES

The single large Oriental Poppy is one of the most striking and showy of all the hardy garden plants. The tall stems, three feet in height, bear great flowers of brilliant scarlet, six or eight inches across. The plants thrive well either in sun or partial shade. The flowers are splendid for cutting, lasting well if cut as they are opening. Plants bloom in June. Perfectly hardy and easily grown from seed. Pkt. 10c.

PORTULACA—ROSE MOSS

This plant will grow and bloom profusely in a dry, hot situation. The plants are of a dwarf spreading habit of growth, flowers of double sorts are like a small rose, and with its many brilliant colors Portulaca makes a beautiful attraction.

BEST DOUBLE MIXED—Pkt. 5c.

RICINUS OR CASTOR BEAN

Stately, strong growing plants, with very ornamental foliage; well adapted as center plants for beds and give a garden a tropical appearance. The gigantic leaves often measure 2 to 2 1-2 feet across. When planted singly or in masses the effect is matchless. Ricinus, pkt. 5c, oz. 15c.

SALVIA—SCARLET SAGE

The Salvia is a splendid bedding plant that keeps the garden bright with color until late in autumn. Splendid for borders and for window boxes. The bushy plants are covered with a great number of flower spikes of the most fiery scarlet, making a very brilliant display through the whole season. Pkt. 10c.

SCARLET RUNNER BEANS

A very hardy annual climber of the bean family; grows rapidly, foliage is quite dense, covered with brilliant scarlet flowers throughout the season. A splendid vine for porches and trellises. Pkt. 5c.

Sweet Sultan

SWEET SULTAN

Flowers in a way resemble *Centaurea* or Bachelor's Button, but very much larger and finer. One of the hardiest and most beautiful annuals. Very hardy and easily grown. No flower garden is complete without this beautiful annual. Ranges in color from pure white through pink to purple. Pkt. 10c.

SWEET PEAS

Perhaps no flower grown in this section gives greater satisfaction than the Sweet Pea. Our soil and climatic conditions seem to be ideal and Sweet Peas flourish here and reach their greatest perfection and beauty. Sow as early in spring as possible, the earlier the better. Soil should be very rich and peas planted deep, 4 to 5 inches, ground should be well mulched with well rotted manure. Sweet Peas will bloom from spring till the snow flies if properly handled.

SPECIAL MIXTURE

This mixture is one of the best. We have handled this for years and it has given our customers the best of satisfaction. Contains all colors in right proportions and makes a beautiful display. Pkt. 10c, oz. 20c, 1-4 lb. 40c.

PRIZE MIXTURE

This is the best mixture obtainable; consists of over one hundred varieties of the large flowering strains including the daintiest colors of all the Spencers. Many who saw this mixture growing last year pronounced it the finest display of Sweet Peas they had ever seen. Nothing in Sweet Peas could be finer. Sow our Prize Mixture and rest assured that no one will have anything finer in Sweet Peas. Pkt. 10c, oz. 30c, 1-4 lb. 75c.

Salpiglosis

SALPIGLOSIS

Our illustration shows form and veinings of this beautiful flower, but only nature can paint its wonderful colors. The blossoms are tube shaped, much like a *Petunia*, but rivaling the latter in the beautiful colors displayed. Each flower is veined with a glint of gold and is the only flower to our knowledge displaying this odd characteristic. Sow the seed in open ground in spring. Blooms in early summer and continues till frost. Try this once and you will always sow it. Best special mixtures, all colors and sorts, pkt. 15c.

SWEET PEAS—SPENCERS

We carry in stock many of the finest Spencer types in the straight colors and list below an assortment of the choicest varieties:

AMERICA SPENCER—Ivory white, striped crimson. Pkt. 10c, 1-2 oz. 25c.

PRIMA DONNA—Soft pink. Pkt. 10c, 1-2 oz. 25c.

NORA UNWIN—Giant pure white. Pkt. 15c, 1-2 oz. 25c.

FRANK DOLBY—Largest and finest pale blue. Pkt. 15c, 1-2 oz. 25c.

BLACK KNIGHT—Dark maroon. Pkt. 10c, 1-2 oz. 25c.

KING EDWARD VII—Fine scarlet. Pkt. 10c, 1-2 oz. 25c.

SALOPIAN—Dark, bright red. Pkt. 10c, 1-2 oz. 25c.

LADY GRISEL HAMILTON—Lavender. Pkt. 10c, 1-2 oz. 25c.

Spencer Sweet Peas

Giant Zinnia

WILD CUCUMBER

A fine annual climber; makes a wonderfully rapid growth; a splendid vine where an abundance of shade is wanted quickly. Seeds should be planted very early and should be thoroughly soaked in very warm water for 24 hours before planting. Pkt. 5c.

ZINNIA

The Zinnia is prized for its brilliant colors, for the size and perfection of its flowers and for its sturdy growth. Sow seed in open ground in May. Blooms from July until killed by frost. No flower known will produce a finer showing than a bed of brilliant colored Zinnias. Finest large flowering mixed. Pkt. 10c, 3 pkts. 25c.

STOCKS

Half hardy annuals, producing splendid spikes of very rich beautiful flowers of delightful fragrance. Can be sown in the open ground in May and will bloom freely first season.

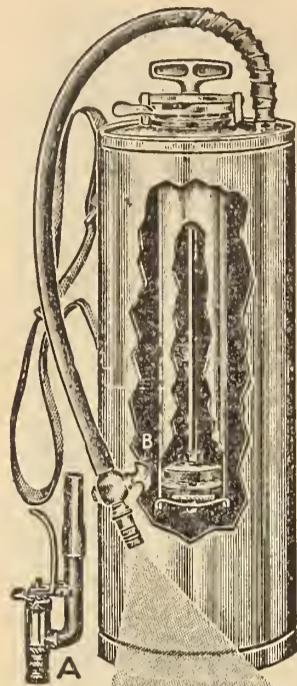

EXTRA CHOICE MIXED—Pkt. 10c.

VERBENIA

Very few plants will make such a gorgeous display during the summer months as Verbenias, or furnish more flowers for cutting. Sow seed in open ground in May, they begin flowering in July and are a riot of bloom until after frost.

CHOICEST MIXED—All colors. Pkt. 10c.

Supply Department

PATENTED.
Auto Spray No. 1

BROWN AUTO SPRAY NO. 1

The invention of the Auto Spray No. 1 commenced a new era in the world of spraying, and made it possible for the small grower to care for his crops equally as well as the man who owns the large acreage.

THE AUTO SPRAY NO. 1 works automatically for six to fifteen minutes, according to the nozzle opening and WILL GIVE HIGHER and MORE CONSTANT PRESSURE THAN ANY OTHER SIMILAR MACHINE.

HOW IT WORKS—The Auto Spray No. 1, when properly charged, contains three gallons of solution and one gallon of compressed air. Eight to twelve strokes of the plunger will compress the air and two pumpings will empty the entire contents.

Every farmer and gardener should have the Auto Spray No. 1 on his place; it covers a wider range of requirements than any other light sprayer on the market. This is the only style of sprayer that will enable the operator to follow a continuous row without stopping, and for that reason EVERY GARDENER SHOULD HAVE THE AUTO SPRAY NO. 1. Invaluable for SPRAYING BUILDINGS, LIVE STOCK, washing carriages, etc. In fact, the AUTO SPRAY NO. 1 will do ANY and ALL KINDS OF LIGHT SPRAYING you have to do.

LASTS A LIFETIME.

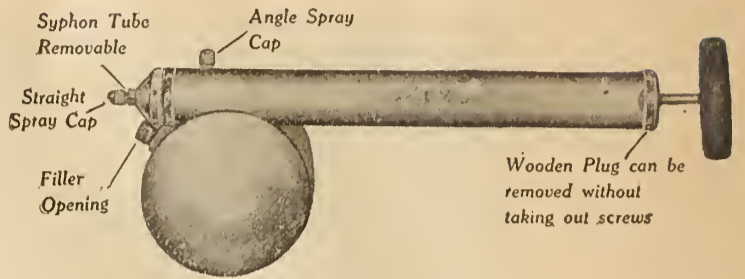

Price, AUTO SPRAY NO. 1, solid brass, \$9.00.

Price, ORCHARD EXTENSIONS, solid brass, 50c.

We will ship the Auto Spray by mail at above prices.

AUTO SPRAY NO. 37

This is the best and most substantial light hand sprayer ever made. Has a compressed air chamber which makes the pressure continuous; has brass nozzles adjustable to spray fine or coarse. Has brass ball valves; is simple in construction and very durable. Price by mail, postpaid, \$1.25.

Auto Spray No. 37

DOUBLE ACTING BUCKET PUMP NO. 5

DETAILED DESCRIPTION

The pump is made entirely of brass. It has two ball valves so arranged that they may be instantly cleaned. The threads are all cut, not rolled, so that there is no chance for leakage. Pump is double acting and will generate a pressure of 180 lbs.

We furnish with this pump 3 1-2 ft. of 3-8 in. suction hose and a heavy strainer that keeps the hose from working out of a bucket or tank.

The strainer screen can be easily taken out of the strainer casting. This strainer has five square inches of screen surface.

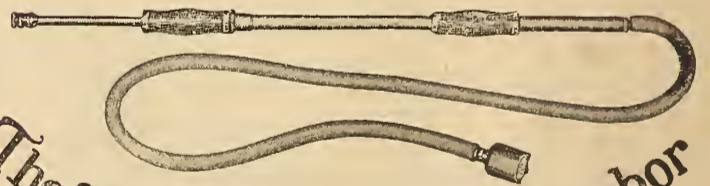

The extension is extra and is very useful for spraying field crops. The extension is so curved that the operator can direct the spray up or down while using the pump in a horizontal position.

The knapsack tank is also extra and is essential where the sprayer has to be continually moved about, such as spraying rows of potatoes.

Galvanized iron reservoir (for use on potatoes or field crops)	3.00

It's Double Acting

The Same Spray With Half The Labor

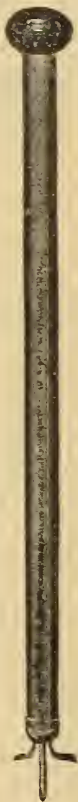

ERADO

(See Illustration on the next page)

ERADO does away with the old fashioned laborious and back-breaking method of digging up dandelions and weeds of all kinds by hand.

It makes obsolete all instruments that only pull the tops off of the plants. Before ERADO was introduced there was no weed-killer that absolutely killed the roots of noxious weeds as well as destroyed the tops. With this handy tool the dandelion or weed is completely killed.

IT KILLS
Erado
WEEDS

An amount of weed-killing solution is dropped on the root; then by turning the tool the top of the plant is cut off. ERADO has two knives so placed that the top of a plant is cut off by only one-half turn of the tool. Weed-killers that have only one knife necessitate a complete turn that makes it necessary to change the grip on the handle of the tool because a person's wrist will not allow the instrument to be turned completely around without changing the hand.

It is a simple matter to refill ERADO. Remove the handle by a half turn. The solution is then put in the tube and handle is easily replaced. ERADO is then ready for work. Push the plunger into the center of the plant. The solution is automatically allowed to run down onto the roots of the plant. Then give ERADO a quick half turn and the top of the plant is cut off. A weed treated in this manner can never spring up again. The roots as well as the top of the plant are destroyed.

EXCLUSIVE FEATURES

ERADO is made entirely of metal and is so built that it is practically indestructible. The handle is so constructed that it enables a person to use this tool day in and day out without blistering or tiring the hands. The handle can be taken off of ERADO instantly and makes refilling a simple manner.

ERADO has two knives which enable the operator to cut off the tops of weeds with one-half the work that implements with only one blade necessitate. The knives are fastened in the metal so that they cannot be broken off.

The valve in the bottom of ERADO is packed with a specially prepared substance that is not affected by either gasoline or iron sulphate. The valve spring is heavy bronze and will not be corroded by solutions used for killing weeds.

TRY ERADO. IT IS GUARANTEED. IF IT IS NOT ENTIRELY SATISFACTORY YOU CAN RETURN THIS IMPLEMENT FOR THE FULL PURCHASE PRICE

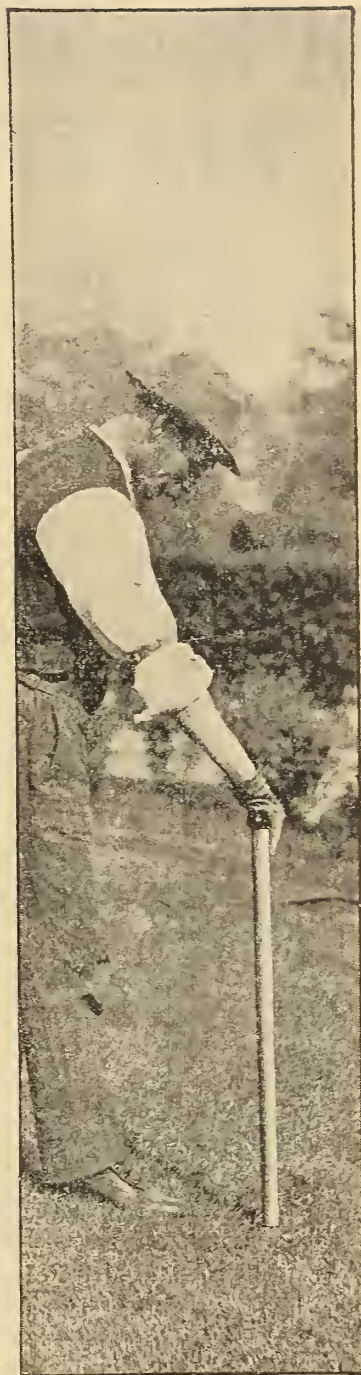

SOLUTIONS TO BE USED:

For killing dandelions and most ordinary weeds, gasoline or salt solution can be used to advantage. One pound of salt should be used to one quart of water.

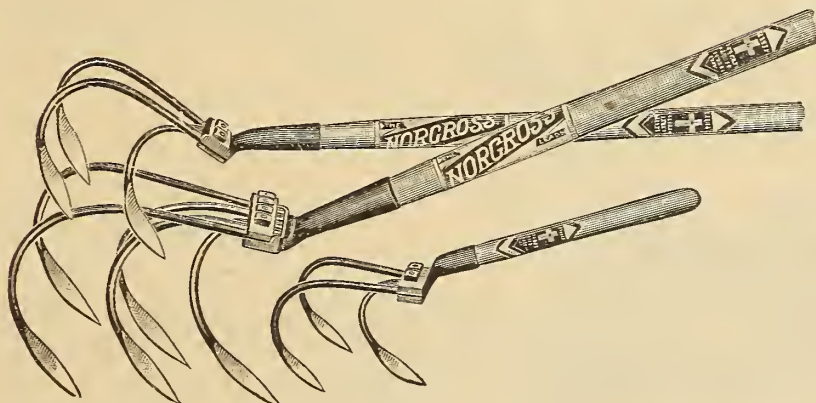

For killing pig weed, rag-weed, and quack-grass use a solution of iron sulphate.

THIS IS A FINE TOOL TO USE IN CLEANING YOUR CLOVER FIELDS OF NOXIOUS WEEDS.

PRICE BY MAIL POSTAGE PAID \$1.00.

Erado in Operation

GARDEN TOOLS

NORCROSS GARDEN CULTIVATOR HOES

These pronged cultivators and weeders are the handiest tools one can have in the garden. MIDGET NORCROSS—Short handle for hand work, such as weeding. Price 45c.

3 PRONG NORCROSS — Long handled and light; can be used by women and children. Price 80c.

5 PRONG NORCROSS—The standard size. A wonderfully useful tool. Every man with a garden, whether large or small, should have one. Price \$1.25.

SPRAYING MATERIAL

TREE TANGLEFOOT

For caterpillars, moths and worms. Protects against all climbing insects. One pound makes a band 9 feet long. Prices: 1 lb. 30c, 3 lbs. 85c, 10 lbs. \$2.65, 20 lbs. \$4.80.

BLACKLEAF 40

Practically same as Blackleaf Extract except in more concentrated form. Used extensively for spraying orchards for Green and Woolly Aphis, etc., also for dipping all kinds of live stock.

Price: Oz. 25c, 1-2 lb. 75c, 2 lbs. \$2.50, 10 lbs. \$10.75, f. o. b. Twin Falls. Blackleaf can not be sent by mail.

TOBACCO DUST

For killing insects on plants and on poultry, for use around fruit trees, etc. Fine for sowing on garden to keep down cut worms and for many other uses. Prices by mail, first and second zones: 1 lb. 15c, 5 lbs. 40c, 10 lbs. 65c, postage paid. By freight or express, 50 lbs. \$2.25, 100 lbs. \$3.75.

HAMMOND'S SLUG SHOT

For destroying slugs, cabbage worms, turnip fleas, currant worms, etc. There is nothing to equal Hammond's Slug Shot for destroying cabbage worms. It gets them every time and the cost is low. Prices by mail: 1 lb. 25c, 2 lbs. 45c, 5 lbs. 75c, 10 lbs. \$1.30 postage paid in first and second zones. If outside second zone see parcel post instructions in front of catalog.

GOPHERGO

(Machine Poisoned Raisins)

GOPHER-GO

For killing gophers, ground squirrels, rats, mice and other rodents. It is an attractive bait, thoroughly poisoned and guaranteed to do the work. Put up in 25c, 50c and \$1.00 cans. Directions on each can.

FARM AND POULTRY BOOKS

We have made arrangements with the publishers to offer our customers the following books this season. They are as good as any in their line and it will pay you well to have them.

SUCCESS WITH HENS

By ROBERT JOOS

This is a splendid work on the handling of hens by a practical poultry man. It is written in a style that any one can understand and gives no end of valuable information. Every one interested in poultry should have this valuable book.

Price \$1.25, postage paid.

MAKING THE FARM PAY

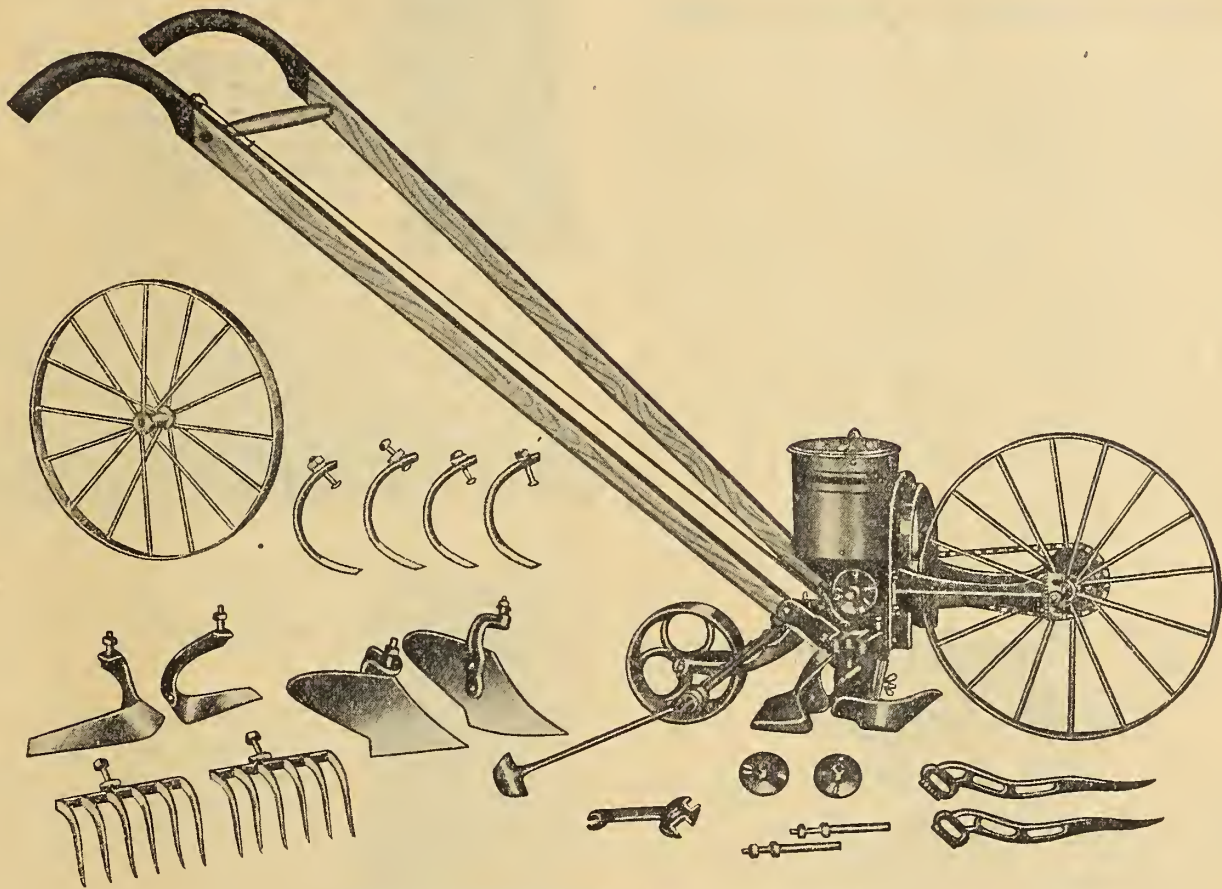

By C. C. BROWNSFIELD

Here is something practical and helpful in the way of a farm publication. It is a regular text book for the farmer, gardener and poultry man. Written in plain understandable language, not a lot of theory but **PLAIN COMMON SENSE**. Every farmer should have this valuable book. Price \$1.25, postage paid.

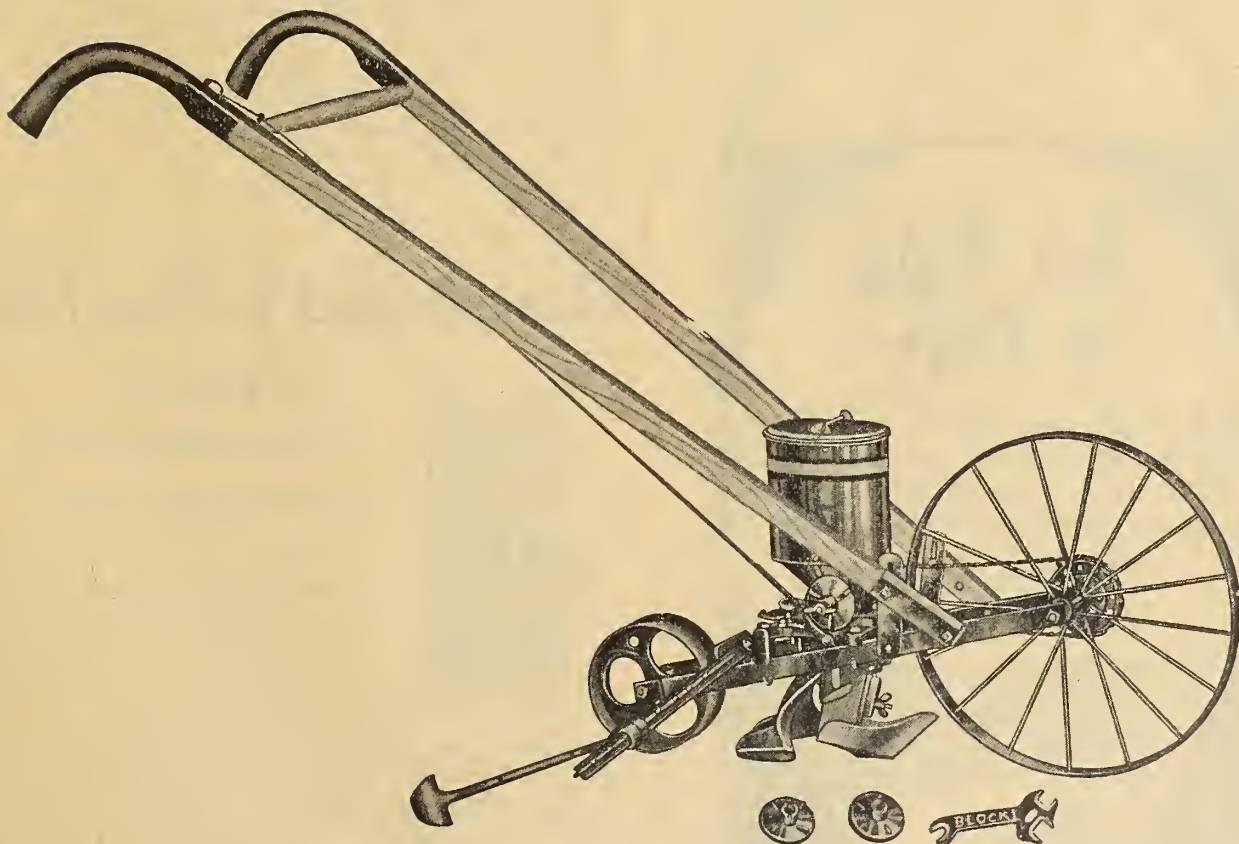

SPECIAL OFFER

With every order for GARDEN and FLOWER seeds amounting to \$10.00 or more we will give you free of charge your choice of one of the above fine books. This offer does not apply on Field Seeds or on our supply lines, but does apply on all orders for Garden or Flower Seeds or both.

Garden Drills and Cultivators

No. 1 Blocki Hill and Drill Seeder

Blocki No. 52 Hill and Drill Seeder

Blocki No. 1 Hill and Drill Seeder

With all Cultivator Attachment

After investigating many makes of garden tools we have decided on the Blocki line as being the most practical and best altogether that we can offer our trade. The price is right and the tools are right in every detail.

The No. 1 outfit will sow all kinds of garden seeds, either in a continuous row or in hills 4, 5, 6, 8, 12 or 24 inches apart as desired. The feed is the brush agitator style, insuring a continuous flow of seed, does not injure or crack the seed and prevents choking.

This is a combination machine and may be changed to a double or single wheel cultivator with all attachments as shown by our illustration. We have sold a number of these machines the past year and they are giving the finest of satisfaction. We strongly recommend BLOCKI GARDEN TOOLS.

PRICE BY FREIGHT OR EXPRESS ONLY,
\$17.00, F. O. B. TWIN FALLS.

No. 51 Blocki Hill and Drill Seeder

The No. 52 outfit is designed for those not desiring to pay for the cultivating tools but needing a high class seeder. It sows in exactly the same manner as the No. 1 outfit, is practically the same in all details but can not be converted into a cultivator.

PRICE BY FREIGHT OR EXPRESS ONLY,
\$14.00 F. O. B. TWIN FALLS.

An Egg a Day

If this is your desire, treat your layers right. Don't force them with all kinds of tonics; help them with a pure, nutritious Milk Substitute.

**"Fill the Basket"
Egg Mash**

does not force; it helps.

Blatchford's MilkMash

MAKES BIG
HEALTHY CHICKS

Your baby chicks once started on the imitation milk will grow rapidly and thrive vigorously. Bowel trouble is unknown to chicks given a few weeks start on this complete milk-equal. It contains BLATCHFORD'S Calf Meal and Dry Milk thoroughly steam cooked. Feed Blatchford's Milk Mash—raise bigger, healthier chicks. See prices below.

Blatchford's Egg Mash

MAKES
MORE EGGS

There has never been anything quite so good or along the same lines as Blatchford's Egg Mash. The addition of Blatchford's Calf Meal and other albuminous compounds, dried milk, etc., promotes the greatest possible egg yield, without unduly forcing or fattening. It is in no way a tonic or condition powder but a straight egg producing food. It is composed of nothing but the highest quality nutriment for every day use. Keep a hopper filled with Egg Mash before hens all the time and get more eggs. See prices below.

Blatchford's Pig Meal

THE PERFECT
MILK SUBSTITUTE
FOR YOUNG PIGS

Easily takes care of the weaning stage — the time the little fellows need good care and the proper gruel to tide them over from the mother's milk to coarser grain feed. At weaning time put them on a gruel of skim milk and BLATCHFORD'S Pig Meal. Feed this three times a day in a suitable place where the sow can not get to it. Don't take chances on losing your pigs or making runts of them at weaning time. Give them the Right Start on BLATCHFORD'S Pig Meal. It means what BLATCHFORD'S Calf Meal means to calves.

Blatchford's Calf Meal

THE COMPLETE MILK EQUAL

Costs less to raise your calves on BLATCHFORD'S and produces a better calf. Can be fed either with skim milk or as a substitute for milk. We have hundreds of satisfied customers in this section using BLATCHFORD'S Calf Meal.

RAISE ALL YOUR CALVES

It is shown by government records and statistics that the slaughter of cattle in the United States between 1900 and 1910 increased 66 per cent; that the slaughter of calves during that period increased more than 500 per cent.

BE WISE

RAISE ALL YOUR CALVES

Take advantage of your opportunity—feed BLATCHFORD'S Calf Meal—raise more and better calves.

Kow-Kure

FOR BARRENNESS AND ABORTION

In past years we have had many inquiries for a good cow remedy for the above diseases, and not desiring to take on an article without merit, we hesitated until we could feel sure that we could offer our trade the best article on the market to meet requirements. It is with a great deal of satisfaction that we present KOW KURE manufactured by the DAIRY ASSOCIATION COMPANY, LYNDONVILLE, VT., to our customers for we feel sure that it will give them absolute satisfaction.

If you have a BARREN cow it means good money to get her producing again. If you have a cow that has ABORTED or is threatened with ABORTION, you are facing a serious loss and should cure her without delay. Kow Kure is the best remedy for the purpose and the cost is small.

A multitude of cow owners keep KOW KURE constantly on hand and use it as an ever-present remedy in all cow diseases. Yet many

KOW-KURE

Doubled her Value

That is the testimony of many a cheerful farmer who has tried Kow-Kure and knows its value as a remedy for all ailments peculiar to cows. If you have unprofitable

BARREN COWS

give them Kow-Kure and double their value. Thousands of barren cows have become prolific breeders by the use of this preparation. Not a "food" but a medicine for cows only. Our book, "The Cost of a Lost Cow," sent FREE.

Dairy Association Co., Mfrs.
Lyndonville, Vt., U. S. A.

of these cow owners do not seem to realize that the regular use of Kow Kure is better than any cow-insurance you could ever buy. By the regular use of Kow Kure we do not mean that it should be given to healthy cows every day. But we do mean that a daily tablespoonful of Kow Kure should be given to every cow in her grain for one week in each month.

There is money to be made in curing sick cows. But there is still more money to be made in keeping your cows healthy and well—so they don't get sick. It is easier to keep cows well than to cure them. It is more profitable, for when a cow is sick or in a run-down condition her yield of milk falls off, and that takes something out of your profits.

A tablespoonful of Kow Kure given once a day in her grain, as suggested above, for one week in each month, will keep any cow up to her best. The cost is so small and the results are so satisfying that the question of cost is really not to be considered at all. The regular use of Kow Kure means the stamping out of all disease from your herd. It means that every cow will be kept up to her maximum as an income-producer for you all the time.

Give every cow a treatment of Kow Kure a few weeks before calving. Prevention is always safer than cure. Kow Kure puts a cow's system in perfect order, thus preventing sickness and disease. Surely it is worth the small cost of such a treatment to know that the cow will deliver a strong, healthy calf and that the cow herself will be kept physically sound, ready to continue her money-making work for you.

Use Kow Kure and be safe. Thousands of cow owners have tested it. It takes only a trial to prove its worth to you.

WE WILL BE MORE THAN PLEASED TO FURNISH YOU A FREE BOOK ON KOW KURE TELLING ALL ABOUT IT, WHAT IT WILL DO, AND GIVING HUNDREDS OF TESTIMONIALS FROM SUCCESSFUL AND SATISFIED USERS. Ask us for it.

PRICE OF KOW KURE, LARGE SIZE CAN, \$1.20; MEDIUM SIZED CAN 60c, postage paid.

GRANGE GARGET CURE, 60c postage paid.
BAG BALM, 60c postage paid.

The Grange Garget cure and Bag Balm are made by the same people who make the Kow Kure and there is nothing better in their line.

Fill-the-Basket Egg Mash Did It!

Bred and Owned by H. J. Kingsbury, Twin Falls

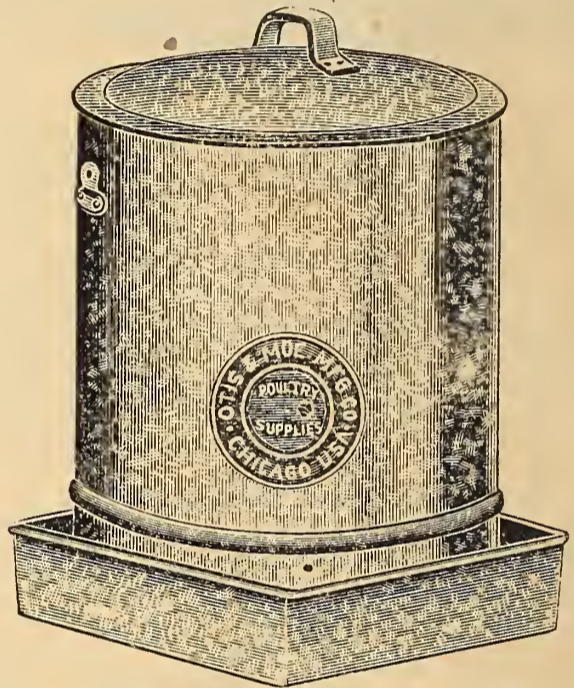

This is a picture of the famous Rhode Island White pullet that laid 26 eggs in December, 1916, in the Northwestern Contest at Pullman, Wash. Our Fill-the-Basket Egg Mash was fed to start her laying—feed it once and you'll never be without it.

THE STANDARD COLONY BROODER

(PATENTED)

GROWS THREE CHICKS
WHERE ONE GREW BEFORE

Cuts the expense in half and
eliminates all the trouble.

This is the COAL-BURNING BROODER that took all the gamble out of the chicken business by eliminating the excessive death loss that was so common with the older types of oil-burning brooders.

You fill this brooder with coal once a day and then it takes care of itself. It is self-feeding, self-regulating, simple, safe and everlasting. It requires no special kind of house and is guaranteed to operate satisfactorily in any room that is big enough for the chicks.
